# Compact Rotary Actuator

Rack & Pinion Type/Size: 10, 15, 20, 30, 40

## Built-in cushion

10, 15 : Rubber bumper  
20, 30, 40: Air cushion

Equipped with an angle adjusting mechanism ( $\pm 5^\circ$ )

Rotary actuator body serves as a flange.

360° type

360°

Piping can be installed from one end.

**CRQ2 Series**

2 auto switches are mountable on the same side.  
(Mountable on the both sides.)

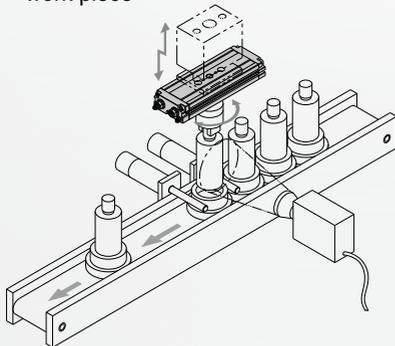

Mounting smaller auto switches prevents the auto switch from protruding from the body edge and realizes space-savings.

Double piston type  
Compact, with no backlash

Both single shaft and double shaft are available in all sizes.

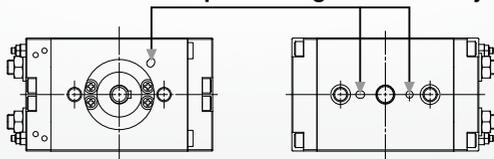

## 360° type application example

Complete external inspection of a work piece

Centering is easy when mounting the main body.

## Moisture Control Tube IDK Series

When operating an actuator with a small diameter and a short stroke at a high frequency, the dew condensation (water droplet) may occur inside the piping depending on the conditions.

Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to [the IDK Series in the Best Pneumatics No.6](#).
