

High Durability Series

RoHS

Dust Resistant Cylinder

■ Up to 6 times more durable in dusty environments

Applicable powder particle size: 20 to 100 μm
 Suitable for environments with ceramic powder, toner powder, paper powder, and metallic powder
 * Excludes weld spatter

■ Can be selected according to the application

A Lube-retainer (stable lubrication function) and a heavy-duty scraper can be mounted on the piston rod.

For the MGP series compact guide cylinder, they can also be mounted on the guide rod (one or both sides).

High Durability Series

High Durability Series is the series name for the "special specification" that offers superior durability and environmental resistance compared to standard products.

Description	Applicable powder particle size	Structure (CQ2)	Durability
With 2 Lube-retainers XC4A	20 to 50 μm	 Lube-retainer	 Standard model 4 times
With heavy-duty scraper + Lube-retainer XC4B	30 to 100 μm	 Lube-retainer Heavy-duty scraper	 Standard model 6 times
With heavy-duty scraper XC4C	50 to 100 μm	 Heavy-duty scraper	 Standard model 2 times

■ The rod cover assembly can be replaced according to the operating environment. (For details [p. 9](#)) * Only for bore sizes $\varnothing 20$, $\varnothing 25$, and $\varnothing 32$ of the CQ2-XC4

Rod Cover Assembly Replacement Procedure (Only for $\phi 20$, $\phi 25$, and $\phi 32$)

[Example of change] When changing from the “-XC4B” to the “-XC4A”

<Rod Cover Assembly Replacement Comparison Chart>

Before replacement		After replacement
XC4A	➡	XC4C
XC4B	➡	XC4A*1
		XC4C*1
XC4C	➡	XC4A

*1 The overall length after replacement remains the same as that of the “-XC4B.”

When replacing the rod cover assembly for maintenance or specification changes, follow the instructions below. If the assembly is not replaced using the correct procedure, its performance may decline significantly.

Additionally, if the rod cover assembly is replaced, it will no longer be covered by the product warranty.

1. Remove the 2 hexagon socket head cap screws (M6 x 1), and remove the rod cover assembly from the cylinder.

* At this time, be careful not to scratch or dent the surface of the piston rod.

2. Apply grease to the surface of the piston rod, and install the new rod cover assembly without scratching the Lube-retainer or scraper.

* At this time, make sure that the Lube-retainer does not fall out.
* Scratching the Lube-retainer or scraper during the installation of the rod cover assembly may seriously impair the performance of the product.

3. After confirming that the rod cover assembly is secured in the correct position (direction), tighten the 2 hexagon socket head cap screws removed in step 1 with the proper tightening torque (5.2 N·m).

* The application of adhesive to prevent looseness is not necessary.

Rod Cover Assembly Part Nos.

Bore size [mm]	XC4A	XC4B	XC4C
$\phi 20$	CQ2B20-XC4A	CQ2B20-XC4B	CQ2B20-XC4C
$\phi 25$	CQ2B25-XC4A	CQ2B25-XC4B	CQ2B25-XC4C
$\phi 32$	CQ2B32-XC4A	CQ2B32-XC4B	CQ2B32-XC4C

* The rod cover assembly includes a cover and a seal.

* A grease pack is not included. Please order one with the part numbers below.

Grease Pack Part Nos.

Kit no.	Grease weight
GR-S-005	5 g
GR-S-010	10 g
