## Air Cylinder

## CM3 Series

 ø20, ø25, ø32, ø40
## Compact with a new construction! New release with full functions Minimized with shorter total length!

Space saving; contributes to downsizing of equipment.

## CM3 Series

## Female rod end available as standard

Applications expanded by making it possible to select either male or female thread within the standard model.

## 2-color indicator solid state auto switch mountable

Possible to confirm whether the position is appropriate at a glance.
Increases effectiveness of adjustment time.

A green light lights up at the optimum operating range.

* Since there are other applicable auto switches than listed above, refer to page 286 for details.
* For details about auto switches with pre-wired connector, refer to pages 1648 and 1649.
* Solid state auto switches marked with " 0 " are produced upon receipt of order.
* Do not indicate suffix "N" for no lead wire on the D-A3 $\square \mathrm{A} / \mathrm{A} 44 \mathrm{~A} / \mathrm{G} 39 \mathrm{~A} / \mathrm{K} 39 \mathrm{~A}$ types.
* The D-G39A/K39A cannot be mounted on the bore size ø20.
*1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance.
A water-resistant type cylinder is recommended for use in an environment which requires water resistance.
*2 1 m type lead wire is only applicable to D-A93.

## Warning

1. Operate the cylinder within the specified cylinder speed, kinetic energy and lateral load at the rod end.
2. The allowable kinetic energy is different between the cylinders with male rod end and with female rod end due to the different thread sizes. Refer to page 274.
3. When female rod end is used, use a washer, etc. to prevent the contact part at the rod end from being deformed depending on the material of the work piece.

## $\triangle$ Caution

1. Use a thin wrench when tightening the piston rod.

## © Warning

## 1. Do not rotate the cover.

If a cover is rotated when installing a cylinder or screwing a fitting into the port, it is likely to damage the junction part with cover.

## $\triangle$ Caution

1. Do not touch the cylinder during operation at a high speed and a high frequency.
Use caution when handling a cylinder, which is running at a high speed and a high frequency, because the surface of a cylinder tube could get so hot enough as to cause you get burned.
2. Do not use the air cylinder as an air-hydro cylinder.
If it uses turbine oil in place of fluids for cylinder, it will result in oil leakage and damage the product.

Note 1）Set part number which includes the auto switch mounting band（BM2－ロपロA）and the holder kit （BJ5－1／Switch bracket：Transparent）．
Since the switch bracket（made from nylon）are affected in an environment where alcohol， chloroform，methylamines，hydrochloric acid or sulfuric acid is splashed over，so it cannot be used．Please consult SMC regarding other chemicals．
Note 2）Set part number which includes the auto switch mounting band（BM2－पロロAS／Stainless steel screw）and the holder kit（BJ4－1／Switch bracket：White）．
Note 3）For the D－M9■A（V）type auto switch，do not install the switch bracket on the indicator light．

## ［Stainless Steel Mounting Screw］

The following stainless steel mounting screw is available．Use it in accordance with the operating environment．（Since switch mounting bracket is not included，order it separately．）
BBA4：For D－C7／C8／H7 types
Note 4）Refer to page 1682 for details of BBA4 screws．
The above stainless steel screws are used when a cylinder is shipped with the D－H7BAL auto switches．When only an auto switch is shipped independently，the BBA4 screw is attached．

（1）BJ $\square-1$ is a set of＂a＂and＂b＂．
（2）BM2－$\square \square \square A(S)$ is a set of＂$c$＂and＂$d$＂． Band（c）is mounted so that the projected part is on the internal side（contact side with the tube）． BJ4－1（Switch bracket：White）
BJ5－1（Switch bracket：Transparent）

Other than the applicable auto switches listed in＂How to Order，＂the following auto switches are mountable． Refer to pages 1575 to 1701 for detailed specifications．

| Type | Model | Electrical entry | Features |
| :---: | :---: | :---: | :---: |
| Solid state auto switch | D－H7A1，H7A2，H7B | Grommet（In－line） | － |

| Reed auto switch | D－B53，C73，C76 |  | － |
|  | D－C80 |  | Without indicator light |

＊With pre－wired connector is also available for solid state auto switches．For details，refer to pages 1648 and 1649.
＊Normally closed（ $\mathrm{NC}=\mathrm{b}$ contact）solid state auto switches（ $\mathrm{D}-\mathrm{F} 9 \mathrm{G} / \mathrm{F9H}$ ）are also available．For details，refer to page 1595.
＊Wide range detection type，solid state auto switch（D－G5NB）is also available．For details，refer to page 1638.
