# Air Cylinder

Ø32, Ø40, Ø50, Ø63, Ø80, Ø100, Ø125

# Adopts an air cushion + rubber bumper structure

3 times better durability

Based on SMC's test conditions

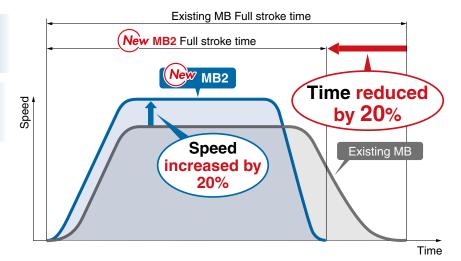

# Allowable kinetic energy: Max. 1.5 times

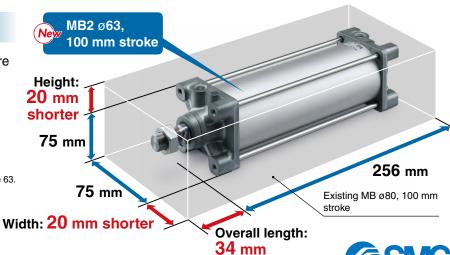

Full stroke time: Reduced by 20%

Piston speed increased by 20%

# **Downsizing**

- It is possible to go down 1 cylinder bore size while maintaining the same allowable kinetic energy.
- Contributes to the downsizing of equipment
- CO<sub>2</sub> emissions (Air consumption) reduced by 38%
  - \* The figure shows bore size 80 downsized to bore size 63.

shorter

MB2 Series

CAT.ES20-297A

# Allowable kinetic energy: Max 1.5 times

Has the same kinetic energy as the existing MB series product which is 1 size larger

| Allowable Kir     | Unit: J |             |
|-------------------|---------|-------------|
| Bore size<br>[mm] | New MB2 | Existing MB |
| 32                | 3.3     | 2.2         |
| 40                | 5.1     | 3.4         |
| 50                | 8.9     | 5.9         |
| 63                | 16.5    | 11.0        |
| 80                | 30.0    | 20.0        |
| 100               | 43.5    | 29.0        |
| 125               | 45.0    | 45.0        |

Example 75 kg is transferred horizontally with a piston speed of 800 mm/s → kinetic energy = 24 J

While the output and load factor are sufficient with bore size ø80/supply pressure 0.5 MPa, bore size ø100 is selected as the max. allowable kinetic energy is only 20.0 J for

bore size ø80.

The allowable kinetic energy is 30.0 J, so bore size ø80 can be selected.

Increased energy saving is possible due to downsizing.

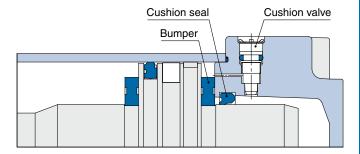

# CO<sub>2</sub> emissions (Air consumption) can be reduced by up to 39%.

#### CO2 emissions (Air consumption) can be reduced due to downsizing. (Air consumption for one cycle) Bore size [mm] ø32 ø40 ø50 ø63 ø80 ø100 ø125 Air consumption [L] 1.3 2.1 3.3 5.3 8.6 13.5 21.4 At 0.5 MPa supply pressure and 150 mm stroke **36**% 39% **38**% **36**% **37**%

#### Reduces cushion stroke time

The air cushion + rubber bumper combined structure allows for improved cushioning performance.

Reduces the metal noise that occurs when the piston stops

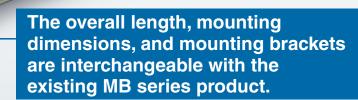

Various switches such as small auto switches and magnetic field-resistant auto switches can be mounted.

Small auto switches

- D-M9□
- · D-A9□

Magnetic field-resistant auto switches

- · D-P3DWA
- · D-P4DW

Part numbers for products with a rod end bracket and/or a pivot bracket are available.

Time saving is possible as the cylinder and brackets do not need to be ordered separately.

\* Rod end brackets and pivot brackets are shipped together with the product but do not come assembled.

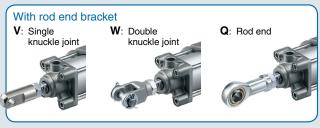

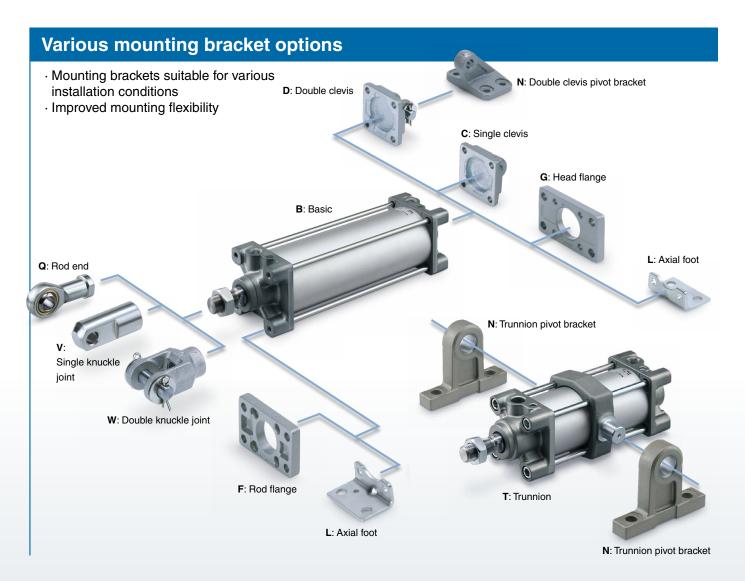

| Pivot bracket |                        |  |  |  |  |  |  |  |
|---------------|------------------------|--|--|--|--|--|--|--|
| Nil           | No bracket             |  |  |  |  |  |  |  |
| N             | Pivot bracket included |  |  |  |  |  |  |  |

 Applicable only to D (Double clevis) and T (Trunnion) mounting types

- \*1 Water-resistant type auto switches can be mounted on the above models, but SMC cannot guarantee water resistance. A water-resistant type cylinder is recommended for use in an environment which requires water resistance.
- \*2 The 1 m lead wire is only applicable to the D-A93.
- $\ast\,$  Solid state auto switches marked with a "O" are produced upon receipt of order.
- \* Auto switches are shipped together with the product but do not come assembled. (However, the auto switch mounting brackets are assembled before shipment.)
- \* There are applicable auto switches other than those listed above. For details, refer to page 22.

| Stroke length tolerance | Up to 500: $^{+2.0}_{0}$ , 501 to 1000: $^{+2.4}_{0}$ , 1001 to 1500: $^{+2.8}_{0}$ , 1501 to 2000: $^{+}_{0}$ 2001 to 2500: $^{+3.6}_{0}$ , 2501 to 2700: $^{+4.0}_{0}$ |         |        |             |          | 000: +3.2 , |     |  |
| Cushion                 | Air cushion + Rubber bumper  |         |        |             |          |             |     |  |
| Mounting                | Basic, Axial foot, Rod flange, Head flange,<br>Single clevis, Double clevis, Trunnion  |         |        |             |          |             |     |  |

<sup>\*</sup> Stroke length tolerance does not include the amount of bumper change. There will be 0.1 to 1.0 mm of bumper distortion depending on the supply pressure.

#### **Strokes**

[mm] Standard stroke Bore size Max. manufacturable stroke [mm] Stroke range ① Stroke range 2 32 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500 Up to 1000 1000 40 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600 50 63 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600 Up to 1800 2700 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800 80 100 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800 125 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800, 900, 1000 Up to 2000

- Applicable strokes should be confirmed according to the usage. For details, refer to the "Air Cylinders Model Selection" in the Web Catalog. In addition, products that exceed the stroke range ① might not be able to fulfill the specifications due to deflection, etc.
- The manufacturing of intermediate strokes is possible. (Spacers are not used.)
- Strokes exceeding the stroke range ② are available as a special order.
- When using a rod boot, a stroke range of up to 1000 mm is available. Strokes over 1000 mm are available as a special order.
- Using a stroke of a length which is smaller than the effective cushion length may result in reduced air cushion performance.

# Ordering Example of Cylinder Assembly

# Cylinder model: MDB2D32-50-NW-M9BW Double clevis Pivot bracket Auto switch Double knuckle joint

Mounting D: Double clevis Pivot bracket N: Yes Rod end bracket W: Double knuckle joint Auto switch D-M9BW: 2 pcs.

Mounting brackets (excluding the trunnion), pivot brackets, rod end brackets (excluding the rod end nut), and auto switch are shipped together with the product.

#### Air Cushion Stroke

| Bore size<br>[mm] | Effective cushion length [mm] |  |  |  |
|-------------------|-------------------------------|--|--|--|
| 32                | 17                            |  |  |  |
| 40                | 17                            |  |  |  |
| 50                | 17                            |  |  |  |
| 63                | 17                            |  |  |  |
| 80                | 26                            |  |  |  |
| 100               | 26                            |  |  |  |
| 125               | 26                            |  |  |  |

Refer to pages 20 to 26 for cylinders with auto switches.

- · Auto Switch Proper Mounting Position (Detection at stroke end) and Mounting Height
- · Minimum Stroke for Auto Switch Mounting
- · Auto Switch Mounting Brackets/Part Nos.
- · Operating Range

|----------------|--------|--------|--------|--------|--------|--------|--------|
| Axial foot*1   | MB-L03 | MB-L04 | MB-L05 | MB-L06 | MB-L08 | MB-L10 | MB-L12 |
| Flange         | MB-F03 | MB-F04 | MB-F05 | MB-F06 | MB-F08 | MB-F10 | MB-F12 |
| Single clevis  | MB-C03 | MB-C04 | MB-C05 | MB-C06 | MB-C08 | MB-C10 | MB-C12 |
| Double clevis  | MB-D03 | MB-D04 | MB-D05 | MB-D06 | MB-D08 | MB-D10 | MB-D12 |

- \*1 When ordering axial foot brackets, order 2 pieces per cylinder.
- \* It is possible to order the mounting brackets separately. Refer to each bore size in the table above for part numbers.
- \* Parts included with each type of mounting bracket are as follows.

Axial foot, Flange, Single clevis: Body mounting bolt

Double clevis: Body mounting bolt, Clevis pin, Flat washer (2 pcs.), Split pin (2 pcs.)

→ Refer to page 12.

## **Rod Boot Material**

| Symbol | Material                 | Max. ambient temp. |
|--------|--------------------------|--------------------|
| J      | Nylon tarpaulin          | 70°C               |
| K      | Heat-resistant tarpaulin | 110°C*1            |

- \*1 Max. ambient temperature for rod boot itself
- \* The rod boot replacement part numbers are listed in the "Maintenance Parts List." Refer to the **Web Catalog**.

## Mounting Brackets, Accessories/Material, Surface Treatment

| Segment           | Description                 | Material           | Surface treatment (ø32 to ø100)                      | Surface treatment (ø125)       |
|-------------------|-----------------------------|--------------------|--|--------------------------------|
|                   | Axial foot                  | Rolled steel       | Zinc chromating                                      | Metallic silver color painting |
| Marrian           | Flange                      | Cast iron          | Metallic silver color painting                       | Metallic silver color painting |
| Mounting brackets | Single clevis               | Cast iron          | Metallic silver color painting after zinc plating    | Metallic silver color painting |
| Diackets          | Double clevis               | Cast iron          | Metallic silver color painting after zinc plating    | Metallic silver color painting |
|                   | Trunnion                    | Cast iron          | Metallic silver color painting after zinc chromating | Metallic silver color painting |
|                   | Double clevis pivot bracket | Cast iron          | Metallic silver color painting after zinc chromating | Metallic silver color painting |

#### Allowable Kinetic Energy

Example) Load limit at the rod end when an air cylinder with a bore size of ø50 is actuated at 500 mm/s Extend upward from 500 mm/s on the horizontal axis of the graph to the intersection point with the line for a 50 mm bore size, and then extend leftward from this point to find the load of 70 kg.

| Bore size [mm]           | 32  | 40  | 50  | 63   | 80   | 100  | 125  |
|--------------------------|-----|-----|-----|------|------|------|------|
| Allowable kinetic energy | 3.3 | 5.1 | 8.9 | 16.5 | 30.0 | 43.5 | 45.0 |

Calculation example)

MB2B32-100 (Basic, Ø32, 100 mm stroke)

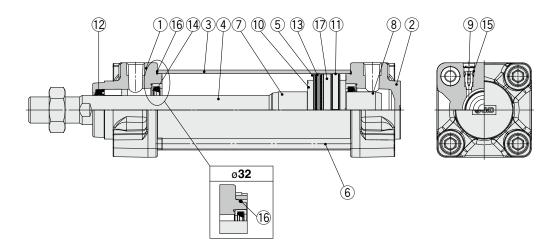

• Basic weight ...... 0.42 (Basic, Ø32)

• Additional weight ...... 0.11/50 mm stroke

• Cylinder stroke ....... 100 mm stroke

0.42 + 0.11 x 100/50 = **0.64 kg** 

# **Replacement Parts**

- \* Seal kits can be ordered using the seal kit part number corresponding to each bore size.
- Trunnion type should not be disassembled.
- The seal kit includes a grease pack (10 g for ø32 to ø50, 20 g for ø80, 30 g for ø100 and ø125).
  - Order with the following part number when only the grease pack is
- Grease pack part number: GR-S-010 (10 g), GR-S-020 (20 g)

  \* Refer to the operation manual for seal replacement instructions.

- The KJ27D is produced upon receipt of order.
- The allowable radial static load shows the allowable value of a single rod end. When the rod end is used for connecting to a cylinder, the allowable radial static load conforms to the cylinder specifications.
- Refer to the Web Catalog for specifications and precautions.

- \*1 Water-resistant type auto switches can be mounted on the above models, but SMC cannot guarantee water resistance.
- A water-resistant type cylinder is recommended for use in an environment which requires water resistance.
- \*2 The 1 m lead wire is only applicable to the D-A93.
- \* Solid state auto switches marked with a "O" are produced upon receipt of order.
- \* Auto switches are shipped together with the product but do not come assembled. (However, the auto switch mounting brackets are assembled before shipment.)
- \* There are applicable auto switches other than those listed above. For details, refer to page 22.

#### Symbol

Double acting type, Air cushion

Refer to pages 20 to 26 for cylinders with auto switches.

- Auto Switch Proper Mounting Position (Detection at stroke end) and Mounting Height
- · Minimum Stroke for Auto Switch Mounting
- Auto Switch Mounting Brackets/Part Nos.
- · Operating Range

- \*1 Kinetic energy is identical to that of the double acting, single rod type.
- \* Stroke length tolerance does not include the amount of bumper change. There will be 0.1 to 1.0 mm of bumper distortion depending on the supply pressure.

#### **Strokes**

|           |   |                | [mm]                  |

- \* Applicable strokes should be confirmed according to the usage. For details, refer to the "Air Cylinders Model Selection" in the **Web Catalog**. In addition, products that exceed the stroke range ① might not be able to fulfill the specifications due to deflection, etc.
- The manufacturing of intermediate strokes is possible. (Spacers are not used.)
- Strokes exceeding the stroke range ② are available as a special order.
- \* When using a rod boot, a stroke range of up to 1000 mm is available. Strokes over 1000 mm are available as a special order.
- \* Using a stroke of a length which is smaller than the effective cushion length may result in reduced air cushion performance.

| Symbol | Material                 | Max. ambient temp. |
|--------|--------------------------|--------------------|
| J      | Nylon tarpaulin          | 70°C               |
| K      | Heat-resistant tarpaulin | 110°C*1            |

- \*1 Max. ambient temperature for rod boot itself
- \* The rod boot replacement part numbers are listed in the "Maintenance Parts List." Refer to the **Web Catalog**.

## Mounting Brackets/Order Nos.

| Bore size [mm] | 32     | 40     | 50     | 63     | 80     | 100    | 125    |
|----------------|--------|--------|--------|--------|--------|--------|--------|
| Axial foot     | MB-L03 | MB-L04 | MB-L05 | MB-L06 | MB-L08 | MB-L10 | MB-L12 |
| Flange         | MB-F03 | MB-F04 | MB-F05 | MB-F06 | MB-F08 | MB-F10 | MB-F12 |

- \* It is possible to order the mounting brackets separately. Refer to each bore size in the table above for part numbers.
- \* When ordering axial foot brackets, order 2 pieces per cylinder.

#### Mounting Brackets, Accessories/Material, Surface Treatment

| Segment           | Description                     | Material           | Surface treatment (ø32 to ø100)                      | Surface treatment (ø125)       |
|-------------------|---------------------------------|--------------------|--|--------------------------------|
|                   | Axial foot                      | Rolled steel       | Zinc chromating                                      | Metallic silver color painting |
| Mounting brackets | Flange                          | Cast iron          | Metallic silver color painting                       | Metallic silver color painting |
| Diadicio          | Trunnion                        | Cast iron          | Metallic silver color painting after zinc chromating | Metallic silver color painting |
|                   | Single knuckle joint            | Free-cutting steel | Zinc chromating                                      | Electroless nickel plating     |
|                   | Double knuckle joint            | Cast iron          | Metallic silver color painting                       | Metallic silver color painting |
| Accessories       | Rod end                         | Carbon steel       | Zinc plating   | Zinc plating                   |
| Accessories       | Knuckle joint pin<br>Clevis pin | Carbon steel       | -  | _                              |
|                   | Rod end nut                     | Rolled steel       | Zinc chromating                                      | Zinc chromating                |
|                   |                                 |                    |  |                                |

\* Refer to pages 11 and 12 for accessory dimensions.

#### **Air Cushion Stroke**

| Bore size<br>[mm] | Effective cushion length [mm] |
|-------------------|-------------------------------|
| 32                | 17                            |
| 40                | 17                            |
| 50                | 17                            |
| 63                | 17                            |
| 80                | 26                            |
| 100               | 26                            |
| 125               | 26                            |

# **Theoretical Output**

|                                       | Trunnion                           | 0.83 | 1.11 | 1.81 | 2.34 | 4.43 | 5.79 | 8.84  |
| Additional weight per 50 mm of stroke | All mounting brackets              | 0.15 | 0.24 | 0.37 | 0.38 | 0.61 | 0.82 | 1.02  |
| Additional weight for magnet          | With auto switch (Built-in magnet) | 0.01 | 0.01 | 0.01 | 0.02 | 0.02 | 0.03 | 0.06  |
|                                       | Trunnion pivot bracket (1 pc.)     | 0.09 | 0.21 | 0.21 | 0.4  | 0.4  | 0.82 | 1.68  |
| Acceptation                           | Single knuckle joint               | 0.15 | 0.23 | 0.26 | 0.26 | 0.60 | 0.83 | 1.08  |
| Accessories                           | Double knuckle joint (with pin)    | 0.22 | 0.37 | 0.43 | 0.43 | 0.87 | 1.27 | 1.58  |
|                                       | Rod end                            | 0.07 | 0.16 | 0.3  | 0.3  | 0.49 | 0.67 | 1.12  |

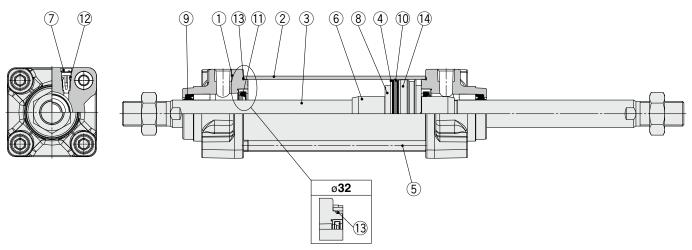

#### Calculation example)

MB2WB32-100 (Basic, ø32, 100 mm stroke)

Basic weight ------ 0.54 (Basic, ø32)
 Additional weight ----- 0.15/50 mm stroke
 Cylinder stroke ------ 100 mm stroke

0.54 + 0.15 x 100/50 = **0.84 kg**

- \* Seal kits can be ordered using the seal kit part number corresponding to each bore size
- corresponding to each bore size.

  \* Trunnion type should not be disassembled.
- \* The seal kit includes a grease pack (10 g for ø32 to ø50, 20 g for ø63 and ø80, 30 g for ø100 and ø125).

Order with the following part number when only the grease pack is needed.

Grease pack part number: GR-S-010 (10 g), GR-S-020 (20 g)

#### [Stainless Steel Mounting Screw]

The following stainless steel mounting screw kit (including set screws) is available. Use it in accordance with the operating environment. (Since the auto switch mounting bracket is not included, order it separately.)

BBA1: For D-M9/A9 types

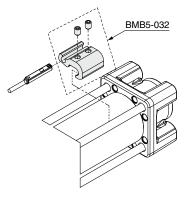

- \* For details on the BBA1, refer to the "How to Mount and Move the Auto Switch" section in the Web Catalog.
- \* When using the D-M9\(\text{A}(V)\), do not use the steel set screws which are included with the auto switch mounting brackets above (BMB5-032, BA7-\(\text{B}\)). Order a stainless steel screw kit (BBA1) separately before use.

# **Operating Range**

|  |    |     |     |                |     |      | [mm] |  |  |  |  |

#### [Stainless Steel Mounting Screw]

The following stainless steel mounting screw kit (including set screws) is available. Use it in accordance with the operating environment. (Since the auto switch mounting bracket is not included, order it separately.)

BBA1: For D-A5/A6/F5/J5 types

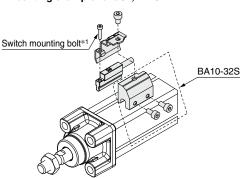

- \* For details on the BBA1, refer to the "How to Mount and Move the Auto Switch" section in the Web Catalog. The above stainless steel screws are used when a cylinder is shipped with the D-F5BA auto switch. When only one auto switch is shipped independently, the BBA1 is attached.
- \* When using the D-Y7BA, do not use the steel set screws which are included with the auto switch mounting brackets above (BMB4-□□□, BA4-□□□). Order a stainless steel screw kit (BBA1) separately before use.

\* Values which include hysteresis are for reference purposes only. They are not a guarantee (assuming approx. ±30% dispersion) and may change substantially depending on the ambient environment.

#### <Mounting example for Ø32, D-P3DWA>

\*1 The switch mounting bolt is supplied with the auto switch.

# **⚠** Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)\*1), and other safety regulations.

⚠ Danger: Danger indicates a hazard with a high level of risk which, If not avoided, will result in death or serious injury.

Warning: Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

⚠ Caution: Caution indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

\*1) ISO 4414: Pneumatic fluid power - General rules and safety requirements for systems and their components ISO 4413: Hydraulic fluid power - General rules and safety requirements for systems and their components IEC 60204-1: Safety of machinery - Electrical equipment of machines - Part 1: General requirements ISO 10218-1: Robots and robotic devices - Safety requirements for industrial robots - Part 1:Robots

## **⚠Warning**

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

- 3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.
  - 1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
  - 2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
  - 3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.
- 4. Our products cannot be used beyond their specifications. Our products are not developed, designed, and manufactured to be used under the following conditions or environments. Use under such conditions or environments is not covered.
  - 1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
  - 2. Use for nuclear power, railways, aviation, space equipment, ships, vehicles, military application, equipment affecting human life, body, and property, fuel equipment, entertainment equipment, emergency shut-off circuits, press clutches, brake circuits, safety equipment, etc., and use for applications that do not conform to standard specifications such as catalogs and operation manuals.
  - 3. Use for interlock circuits, except for use with double interlock such as installing a mechanical protection function in case of failure. Please periodically inspect the product to confirm that the product is operating properly.

## **⚠** Caution

We develop, design, and manufacture our products to be used for automatic control equipment, and provide them for peaceful use in manufacturing industries.

Use in non-manufacturing industries is not covered.

Products we manufacture and sell cannot be used for the purpose of transactions or certification specified in the Measurement Act.

The new Measurement Act prohibits use of any unit other than SI units in

#### Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".

Read and accept them before using the product.

#### **Limited warranty and Disclaimer**

- 1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.\*2) Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
- 2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
- 3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.
  - \*2) Vacuum pads are excluded from this 1 year warranty. A vacuum pad is a consumable part, so it is warranted for a year after it is delivered. Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

#### **Compliance Requirements**

- 1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
- 2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

↑ Safety Instructions Be sure to read the "Handling Precautions for SMC Products" (M-E03-3) and "Operation Manual" before use.
