* This product uses grease for food processing equipment (certified by NSF-H1) for fluid contact parts.

* The grease used for the built-in solenoid valve is not grease for food processing equipment. The solenoid valve exhaust may be discharged from EXH to the outside of the unit. If required, connect a pipe outside the area.

* Due to the structure of this product, wear debris and lubricant may flow to the OUT side of the product, so be sure to connect the required air preparation equipment, such as an air filter. Decide the specifications of the devices according to the equipment on the OUT side of this product.

HF□ Series Precautions

Be sure to read this before handling the products.

⚠ Safety Instructions Be sure to read the “Handling Precautions for SMC Products” (M-E03-3) and “Operation Manual” before use.

⚠ Caution

1. When selecting equipment, carefully consider the application, required specifications, and operating conditions (fluid, pressure, flow rate, filtration, and environment), making sure not to exceed the specification range.
2. This product is provided for normally typical forms of use in the manufacturing industry. As such, to use the product for applications that may affect the human body directly or indirectly, such as caisson shield, breathing, food, and the medical treatment, be sure to consult SMC in advance.
It is not necessary to consult SMC when the product is used as an air blower for food.
3. When the product is used as an air blower, install an appropriate filter to eliminate foreign matter in compressed air for air blowing. (Refer to the example of pneumatic circuit on page 3).
4. The solenoid valve generates particles from the wear of sliding parts inside. When the solenoid valve is used as an air blower, install an appropriate filter (filtration of 0.01 μm) on the outlet of the solenoid valve to prevent foreign matter from flowing to the downstream. Filters require regular inspection, replacement of the element, and maintenance referring to the operation manual for standard products.
5. Quality management relating to hygiene for food and medical treatment is not implemented for this product.
6. Compressed air hygiene should be managed in accordance with national and regional rules and regulations.
7. Grease
 - Fluid contact parts: NSF H1 grade grease
 - Part other than fluid contact parts:
NSF H1 grade grease or grease which is not NSF H1 grade

Pressure Gauge Specific Product Precautions
