

Air Slide Table Series MXQ

ø6, ø8, ø12, ø16, ø20, ø25

Cylinder with built-in guide rail and table
Now with recirculating linear ball bearings
for high rigidity and high precision
Air slide table for precise assembly applications

High precision and compact

MXQ compared with MXS (mm)

Model	Accuracy		Dimensions		
	Parallelism	Height tolerance	Width	Height	Length
MXQ12-30	0.035	±0.08	46	30	86
MXS12-30	0.2	±0.2	50	32	80

Improved against loads

About 3 times stronger against unexpected excessive external forces compared with MXS series

Standardized symmetric style

Available for all options

Ample options for stroke adjustment

Pin holes for positioning

Improved repeatability of work mounting

Work mounting tap

Improved strength

End plate is made of extra duralumin. (Except the buffer style)

Dual rod

Double the output of previous cylinder

Recirculating linear ball bearing

Widened main body of linear guide block is made of martensitic stainless steel

Wide variety of options

Adjuster option and functional option are available in combination.

Symmetric Style	Adjuster options	Functional options
	With stroke adjuster With shock absorber 	With buffer With end lock Axial piping

Through hole for body mounting

Mounting groove for auto switch

Auto switch is mounted in recessed groove for added protection and convenience.

Built-in table and guide rail

Made of martensitic stainless steel

Pin holes for positioning

Improved repeatability of body mounting

Body mounting tap

Mounting from 3 direction available

① Lateral mounting (Body tap)

② Lateral mounting (Through hole)

③ Vertical mounting (Body tap)

Applications

For Z axis of pick and place

For positioning of pallet on a conveyor

MXQ25	MXQ25L	25																												D-F9 <input type="checkbox"/> WV

Adjuster Options

All adjuster bolts are standardized for the extension and retraction end stroke adjuster, and the three different styles of cushion mechanisms.

- Rubber stopper
Standard stroke adjuster
- Shock absorber
For heavy duty and/or high speed use.
Absorbs impact at end of stroke
Provides smooth stops
Improves accuracy when stopping
- Metal stopper
Improves stopping accuracy
For light duty and low speed use only

Functional Options

With buffer

- Eliminates impacts at the extend stroke end to protect the work and tool.
- Auto switch is installable on the buffer section.

Setting ON or OFF at normal status according to the direction of the auto switch

Application example

For insertion application, buffer mechanism absorbs the impact of a shock and protects from damages if the work piece arrives at the wrong location as a result of poor alignment.

With end lock

- Maintains the original position of the cylinder after air pressure shut off, thus preventing the work from falling.

Axial piping

- Organizes all piping into axial directions and frees up space around the body.

Series MXQ/Precautions ①

Be sure to read before handling.

Refer to p.0-39 to 0-43 for Safety Instructions and common precautions.

Selection

⚠ Caution

- ① **Do not apply a load beyond the range of the operation limits.**
Select the model by using the maximum allowable load and allowable moment. Refer to pages p.3.12-12 for details. When an actuator is used beyond its operating limits, eccentric loads on the guide section will be in excess which results in shorter life span due to play or inaccuracy of guide section.
- ② **If a table is stopped at an intermediate position by an external stopper, avoid ejection.**
If ejection occurs, it causes damage. If a slide table is stopped at an intermediate position by an external stopper and then forwarded to the front, draw back the intermediate stopper after supplying pressure to allow the slide table to return to the back for an instant, then supply pressure to the opposite port to operate the slide table.
- ③ **Do not use in circumstances that excessive, external forces or impacts would be applied.**
These conditions could lead to malfunctions.

Mounting

⚠ Caution

- ① **Do not scratch or dent the mounting side of the body, table or end plate.**
Decreasing flatness on the mounting surface causes play in the guide section and increases sliding resistance.
- ② **Do not scratch or dent on the forward side of the rail or guide.**
It can generation play in the guide section and increase sliding resistance.

- ③ **Do not apply excessive impacts or moments when a work is mounted.**
If external load beyond the specified allowable moment is applied, it generates play in the guide section and increases sliding resistance.
- ④ **Flatness of mounting surface should be 0.02mm or less.**
Insufficient flatness of work piece of base to which an air slide table is mounted can generates play in the guide section and increase sliding resistance.
- ⑤ **When connecting with loads which has external support or external guide mechanism, select the connection and align properly.**
- ⑥ **Take care to prevent contact with objects such as a hand while an air slide table is in operation.**
A hand can be caught by an adjuster. Install a protection cover if anything could interfere during its operation.
- ⑦ **Do not bring into close contact with objects which would be influenced by magnetic fields.**
As an air slide table has magnets built-in, do not allow close contact with magnetic disks, magnetic cards or magnetic tapes. Data may be erased.

- ⑧ **When mounting an air slide table, screws of appropriate length should be used and tightened properly within the maximum tightening torque.**
If screws are tightened beyond designed limits, malfunction may occur. If they are tightened insufficiently, it may result in sliding of falling off from its position.

1. Side body tapped

Model	Bolt used	Max.tightening torque Nm	Max.screw-in depth (ℓ mm)
MXQ 6	M4 X 0.7	2.1	8
MXQ 8	M4 X 0.7	2.1	8
MXQ12	M5 X 0.8	4.4	10
MXQ16	M6 X 1	7.4	12
MXQ20	M6 X 1	7.4	12
MXQ25	M8 X 1.25	18	16

2. Side through hole mounting

Model	Bolt used	Max.tightening torque Nm	ℓ mm
MXQ 6	M3 X 0.5	1.2	10.5
MXQ 8	M3 X 0.5	1.2	12.5
MXQ12	M4 X 0.7	2.8	16
MXQ16	M5 X 0.8	5.7	21
MXQ20	M5 X 0.8	5.7	26
MXQ25	M6 X 1	10	32

3. Top body tapped

Model	Bolt used	Max.tightening torque Nm	Max.screw-in depth (ℓ mm)
MXQ 6	M2.5 X 0.45	0.5	4
MXQ 8	M3 X 0.5	0.9	4
MXQ12	M4 X 0.7	2.1	6
MXQ16	M5 X 0.8	4.4	7
MXQ20	M5 X 0.8	4.4	8

Series MXQ/Precautions ②

Be sure to read before handling.

Refer to p.0-39 to 0-43 for Safety Instructions and common precautions.

Mounting

⚠ Caution

1. Front mounting

⚠ Caution

Use bolts at least 0.5mm shorter than maximum thread depth to prevent bolts from contacting the end plate. If the bolts are too long, they hit the end plate and may cause malfunctions.

Model	Bolts used	Max. tightening torque Nm	Max. screw-in depth (l mm)
MXQ 6	M3 X 0.5	0.9	5
MXQ 8	M4 X 0.7	2.1	6
MXQ12	M5 X 0.8	4.4	8
MXQ16	M6 X 1	7.4	10
MXQ20	M6 X 1	7.4	13
MXQ25	M8 X 1.25	18	15

2. Top mounting

⚠ Caution

Use bolts at least 0.5mm shorter than maximum thread depth to prevent bolts from contacting the guide block. If the bolts are too long, they hit the guide block and cause damage.

Model	Bolts used	Max. tightening torque Nm	Max. screw-in depth (l mm)
MXQ 6	M3 X 0.5	1.2	4
MXQ 8	M3 X 0.5	1.2	4.8
MXQ12	M4 X 0.7	2.8	6
MXQ16	M5 X 0.8	5.7	7
MXQ20	M5 X 0.8	5.7	9.5
MXQ25	M6 X 1	10	11.5

Environment

⚠ Caution

- ① **Do not use in an environment exposed directly to liquids such as cutting oil.**
If used in an environment exposed to cutting oil, coolant or oil mist, it generates play, increased sliding resistance of air leakage.
- ② **Do not use in an environment exposed directly to powder, dust or spatter etc.**
It generates play, increases sliding resistance or air leakage. Consult SMC for use in such an environment.
- ③ **Install a shade screen if exposed to the direct sun light.**
- ④ **Install a blocking cover if a heat source is in the area.**
The product temperature may rise above the range of usage limit by radiant heat if a heat source is in the area. Install a cover to block from heat source.
- ⑤ **Do not use in the area where there are vibrations or impacts.**
It results in damage or malfunction. Consult SMC for usage under these environment.

Caution in Handling Adjuster Options

Stroke Adjuster

⚠ Caution

- ① **Do not replace the bolts. Use only bolts included for this use.**
Improper attachment may generate play or damage by force of impacts, etc.
- ② **Follow the table for tightening torque of lock nuts.**
Insufficient tightening will cause deterioration of positioning accuracy.

Model	Tightening torque Nm
MXQ 6	3.0
MXQ 8	5.0
MXQ12	12.5
MXQ16	25.0
MXQ20	43.0
MXQ25	69.0

Caution in Handling Adjuster Options

Stroke Adjuster

⚠ Caution

- ③ **Do not apply a tool like a spanner to tables. It will cause a play.**

With Shock Absorber

⚠ Caution

- ① **Never turn or adjust the screws on bottom of the shock absorber body.**
The screws are not for adjusting. It will cause oil leakage.
- ② **Do not scratch the sliding surface of the shock absorber piston rod.**
It causes loss of durability and inadequate return.

- ③ **Shock absorbers are expendable parts. It may be necessary to change them when energy absorbing capacity decreases.**

Applicable size	Shock absorber
MXQ 8	RB0805
MXQ12	RB0806
MXQ16	RB1007
MXQ20	RB1411
MXQ25	RB1412

- ④ **Follow the table for tightening torque of shock absorber lock nuts.**

Model	Tightening torque Nm
MXQ 8 MXQ12	1.67
MXQ16	3.14
MXQ20 MXQ25	10.8

Series MXQ/Precautions ③

Be sure to read before handling.

Refer to p.0-39 to 0-43 for Safety Instructions and common precautions.

Precautions for Handling Functional Options

With End Lock

⚠ Caution

- ① **Use 2 position, 4/5 port valve for solenoid valve.**
It will causes a malfunction on the control circuit that exhausts at both such as 3 position valve with exhaust center.

Recommended pneumatic circuit

- ② **Make sure to connect the cylinder to speed controller at the meter-out side.**
It causes a malfunction if used as a controller at meter in side or used without a speed controller.
- ③ **Make sure to release pressure when end lock will be released manually.**
If end lock is released while pressure is still remains, it may damage the actuator by unexpected ejection.

How to release end lock manually

Make sure no pressure is applied before operation

- ① Press down lock piston
- ② Slide the table forward.

With Buffer Function

⚠ Caution

- ① **Use air slide table with buffer function in the following positions.**
For horizontal use, adjust the speed according to the load while the auto switch may operate by a stroking buffer in operation depending on the load or speed.

- ② **Auto switch with buffer function:**
Refer to the following table for the proper mounting positions at detection of stroke end.

* Adjust the switch position according to loads or speed

(Unit: mm)

Model	A	B
MXQ 6	2	3
MXQ 8	2.5	
MXQ12	4	
MXQ16	5	
MXQ20	5.5	
MXQ25	10	

Precaution for Symmetric Style

⚠ Caution

- ① **Maintain a minimum spacing of at least 3mm if standard style and symmetric style are used side by side.**
It malfunctions if standard style and symmetric style are used close together.

With Buffer Mechanism Specifications

Model	MXQ6	MXQ8	MXQ12	MXQ16	MXQ20	MXQ25	
Bore size (mm)	6	8	12	16	20	25	
Operating speed range	50 to 500mm/s (50 to 300mm/s for horizontal use)						
Buffer stroke (mm)	5			10			
Buffer stroke load (N)	At 0 stroke	3	5	10	13	17	21
	At max.stroke	6	8	13	17	25	29

Note 1) Refer to p.3.12-5 for cautions when handling buffer functions.
 Note 2) When adjusting stroke with extension stroke end adjuster, the buffer stroke is shortened by the adjusted length.

Auto Switch Applied for Buffer Section

Style	Model No.	Specifications	Electrical entry
Solid state switch	D-F9BV	2 wire with light	Perpendicular
	D-F9NV	3 wire W/ light, Output style: NPN	
	D-F9PV	3 wire W/ light, Output style: PNP	

Please order separately for auto switch with buffer mechanism from above model.

Component Parts/With end lock

No.	Description	Material	Note
㉖	Body for lock	Aluminum alloy	Hard anodized
㉗	Table support	Carbon steel	Anticorrosive treatment
㉘	Rod cover	Aluminum alloy	
㉙	Piston rod	Stainless steel	
㉚	Bush	Aluminum alloy	Chromate treatment
㉛	Blanking plug	Brass	Electroless nickel plated
㉜	Return spring	Stainless steel	
㉝	Piston seal	NBR	
㉞	Rod seal	NBR	
㉟	O ring	NBR	
㊱	O ring	NBR	

Component Parts/Axial piping

No.	Description	Material	Note
㊲	Plate for axial piping	Aluminum alloy	Hard anodized
㊳	Pipe	Aluminum alloy	Hard anodized
㊴	Bush	Aluminum alloy	Chromate treatment
㊵	Stud	Brass	Electroless nickel plated
㊶	O ring	NBR	
㊷	O ring	NBR	
㊸	Gasket	NBR, Stainless steel	
㊹	O ring	NBR	

* Seal kits consist of items in the list below, and can be ordered using the kit number for each respective cylinder bore size.

How to Mount Auto Switch

⚠ Caution Tool for Mounting Auto Switch

- Use a clock screw driver with approximately 5 to 6 mm handle diameter for tightening set screws shipped with auto switch.

Tightening torque

- Use the tightening torque value approximately 0.05 to 0.1 Nm. When you begin to feel that the screw is tightening, turn it 90° further.

Solid-state Auto Switches for Direct Mounting Series D-M9N(V)/D-M9P(V)/D-M9B(V)

Grommet

- Reduced load currents for two-wire model (2.5 to 40 mA)
- Compliance with lead-free requirements
- Use of UL-approved lead wires (style 2844)

Internal circuits

D-M9N/M9NV

D-M9P/M9PV

D-M9B/M9BV

Auto Switch Specifications

PLC: Programmable Logic Controller

D-M9□/D-M9□V (with Indicator light)						
Model number	D-M9N	D-M9NV	D-M9P	D-M9PV	D-M9B	D-M9BV
Electrical entry	In-line	Perpendicular	In-line	Perpendicular	In-line	Perpendicular
Wiring	Three-wire			Two-wire		
Output	NPN		PNP		—	
Applicable load	Integrated circuit, relay and PLC				24 V DC relay and PLC	
Power voltage	5, 12, or 24 V DC (4.5 to 28 V DC)				—	
Current consumption	10 mA or less				—	
Load voltage	28 V DC or less		—		24 V DC (10 to 28 V DC)	
Load current	40 mA or less				2.5 to 40 mA	
Internal voltage drop	0.8 V or less				4 V or less	
Leakage current	100 μA max. at 24 V DC				0.8 mA or less	
Indicator light	Red LED lights when ON.					

- Lead wire: oil-proof heavy-duty vinyl cable
2.7 x 3.2 with elliptic cross-section, 0.15 mm², two cores (D-M9B),
or three cores (D-M9N and D-M9P)

Solid state switch specifications

Leakage current	3-wire: 100 μA or less; 2-wire: 0.8 mA max.
Operating time	1 ms or less
Impact resistance	1000 m/s ²
Insulation resistance	50 MΩ or more at 500 V DC (between lead wire and case)
Withstand voltage	1000 V AC for 1 min. (between lead wire and case)
Ambient temperature	-10°C to 60°C
Enclosure	IEC529 standard IP67, JIS C 0920 watertight construction

Weight

Unit: g

Model	D-M9N(V)	D-M9P(V)	D-M9B(V)
Lead wire length (m)	0.5	8	7
	3	41	38
	5	68	63

⚠ Specific Product Precautions

Be sure to read before handling. Contact SMC when the required specification is out of range.

Handling

⚠ Caution

Observe the following precautions when handling the product.

- The D-M9 series of auto switches is not overcurrent-protected. Faulty wiring or short circuit may result in breakage or burning-out of the switch.
- When stripping the cable clad, be careful about the orientation of the cable being stripped. The insulator may be accidentally torn or damaged depending on the orientation, as shown on the right.

- We recommend the following tools

Manufacturer	Product name	Product number
VESSEL	Wire stripper	No 3000G
Tokyo Ideal	Strip master	45-089

* The stripper for the round shape cords (ø2.0) is for a 2-wire style.

- Please do not attach the switch with any other screws than those already attached to the auto switch body.

The operation range is shorter than that of the conventional models.

If the auto switch replaces the conventional model, it may not function depending on its application because the operation range is shorter. Refer to the examples below.

- In an application where at the end, the stopping position shifting range is larger than the operation range. For example, pushing a work against something, or pressing a work into a hole, or clamping a work.
- In an application where the auto switch is used to detect an intermediate stopping position. (Detecting time is shortened.)

Note) Please contact SMC for the operation range details for each actuator.

The switch is damaged instantly when a load is shortened since short circuit protection is not built-in. Pay special attention to avoid reversing the connection of the brown lead of the power supply line and the black output line connection.
