Water Separator  Element-less specification
AF20/30/40-□□□-□-A-X2729

The element-less specification eliminates the need for replacement.

- Water droplets are removed by centrifugal force.
- Water droplet removal ratio: 99%
  (At rated flow, based on SMC's measuring conditions)
- Air containing water droplets is rotated to remove them by centrifugal force.

Better environmental resistance with 2-layer construction

- The bowl is covered with a transparent bowl guard!
  - Body size 30 or more
  - Instead of windows on the bowl guard, the inner bowl is covered with a polycarbonate transparent bowl guard. Now, even if the environment changes and the bowl is exposed to corrosive chemical or oil splash, the foreign matter will not stick directly to the pressurized bowl. This reduces the risk of bowl breakage.

Connectable to modular F.R.L. units

- Superior visibility
  - The status inside the bowl can be checked from all directions.

Application example

- Protection of pneumatic equipment in a machine tool

Simple Specials System

- Units with an F.R.L are available through the simple specials ordering system. The lead time is almost the same as the standard product.
  - Please contact your local sales representative for more details.

Caution

To ensure the safest possible operation of this product, please be sure to thoroughly read the "Safety Instructions" in our "Best Pneumatics" catalog before use.

*1 This shows the water droplet removal ratio at the rated flow rate under SMC’s measuring conditions. This product can remove water droplets, but cannot remove other moisture content (water vapor). If the flow rate is less than the rated flow rate, the water droplet removal ratio will decrease.

*2 P1 = 0.7 MPa pressure. Be aware that when a fluid flows at a flow rate exceeding the rated flow rate, the accumulated condensate may be pulled up and may flow out to the outlet side.

*3 This product cannot remove any oil content or solid foreign objects.

### How to Order

Symbol: When more than one specification is required, indicate in alphanumeric order.

#### AF30-02 BD-A-X2729

- **Body size**
  - 20: Body size 20
  - 30: Body size 30
  - 40: Body size 40

- **Pipe thread type**
  - Nil
  - Rc
  - N: NPT
  - F: G

- **Port size**
  - Symbol: Port size
  - Body size: 20 30 40
  - 01: 1/8
  - 02: 1/4
  - 03: 3/8
  - 04: 1/2
  - 06: 3/4

- **Bowl**
  - Symbol: Bowl
  - Body size: 20 30 40
  - Nil
  - Polycarbonate bowl
  - Metal bowl
  - Nylon bowl
  - Metal bowl with level gauge
  - With bowl guard
  - With bowl guard (Nylon bowl)

- **Drain port**
  - Nil
  - With drain cock
  - Drain guide 1/8
  - Drain guide 1/4
  - Drain cock with barb fitting

- **Flow direction**
  - Nil
  - Flow direction: Left to right
  - Flow direction: Right to left

- **Pressure unit**
  - Nil
  - Name plate and caution plate for bowl in SI units: MPa
  - Name plate and caution plate for bowl in imperial units: psi, °F

- **Mounting**
  - Nil
  - Without mounting option
  - With bracket

- **Float type auto drain**
  - Nil
  - Without auto drain
  - N.C. (Normally closed) Drain port is closed when pressure is not applied.
  - N.O. (Normally open) Drain port is open when pressure is not applied.

---

*1 Drain guide is an NPT thread. The auto drain port comes with a ø3/8” One-touch fitting (applicable to the AF30-A-X2729 and AF40-A-X2729).

*2 Drain guide is a G thread. The auto drain port comes with a ø10 One-touch fitting (applicable to the AF30-A-X2729 and AF40-A-X2729).

*3 Option B is not assembled and supplied loose at the time of shipment. Assembly consists of a bracket and 2 mounting screws.

*4 When pressure is not applied, condensate which does not start the auto drain mechanism will be left in the bowl. Releasing the residual condensate before ending operations for the day is recommended.

*5 If the compressor is small (0.75 kW, discharge flow is less than 100 L/min [ANR]), air leakage from the drain cock may occur during the start of operations. The N.C. type is recommended.

*6 A bowl guide is provided as standard equipment (polycarbonate).

*7 A bowl guide is provided as standard equipment (nylon).

*8 The combination of float type auto drain C and D is not available.

*9 Without a valve function

*10 The combination of bowl 2 and 8 is not available.

*11 For pipe thread type: NPT

*12 ○: For pipe thread type: NPT only

---

* This product is for overseas use only according to the New Measurement Act. (The SI unit type is provided for use in Japan.)
