

Series SQ1000 **Plug Lead Unit**

How to Order Manifold

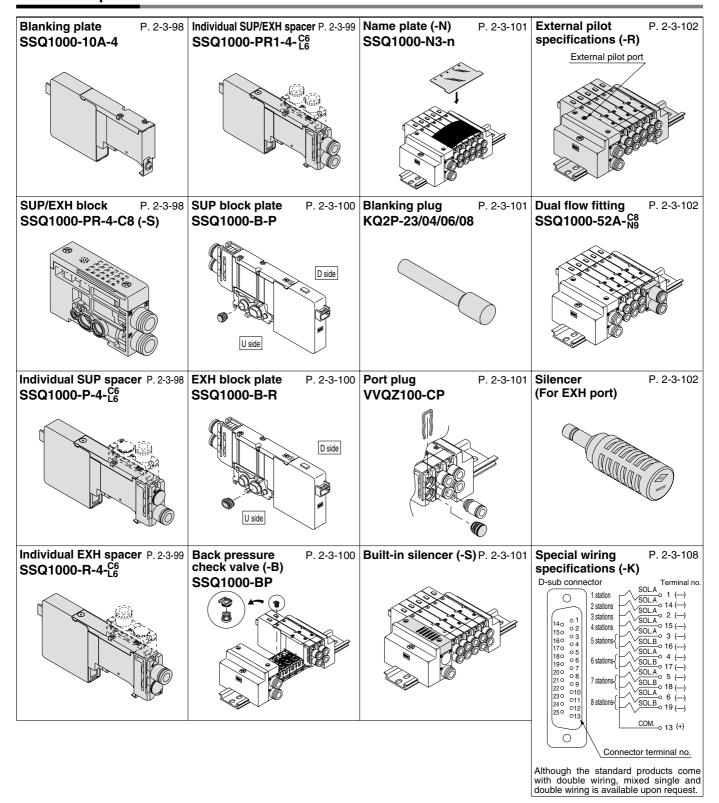

Electrical entry •						
Kit type		Lead wire connector location	Cable specifications	Station	Max. number of stations for special wiring specifications	Max. number of solenoids
F kit U side	FD0		D-sub connector (25P) kit, without cable			
	FD1	D side	D-sub connector (25P) kit, with 1.5 m cable	1 to 12 stations	s 24 stations	
D-sub Dside	FD2	Diside	D-sub connector (25P) kit, with 3.0 m cable	1 to 12 stations	24 Stations	24
Connector kit	FD3		D-sub connector (25P) kit, with 5.0 m cable			
P kit	PD0		Flat ribbon cable (26P) kit, without cable			
	PD1	(1)	Flat ribbon cable (26P) kit, with 1.5 m cable	1 1- 10 -1-1	s 24 stations	24
	PD2	D side	Flat ribbon cable (26P) kit, with 3.0 m cable	1 to 12 stations	24 stations	24
(26P)	PD3		Flat ribbon cable (26P) kit, with 5.0 m cable			
Flat ribbon cable connector kit (26P)	PDC]	Flat ribbon cable (20P) kit, without cable	1 to 9 stations	18 stations	18
Flat ribbon cable (20P) (PC Wiring System compatible)	JD0	D side	Flat ribbon cable (20P) PC Wiring System compatible	1 to 8 stations	16 stations	16
C kit	С	_	Connector kit	1 to 24 stations	_	_
Connector kit						

Note 1) Separately order the 20P type cable assembly for the P kit.

Note 2) The maximum number of stations should not be more than the maximum number of solenoids. (The number of solenoids are counted as: 1 for single solenoids and 2 for type 3P and 4P double solenoids.)

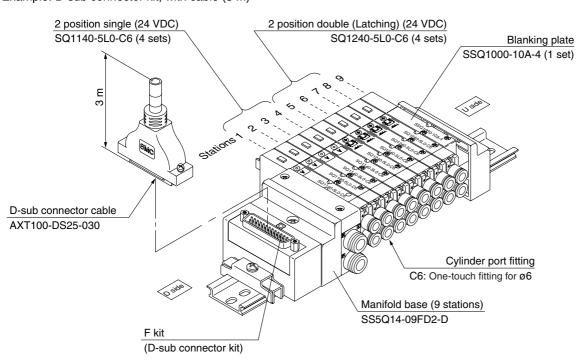

Series SQ1000

Manifold Option

How to Order Manifold Assembly (Example)

Example: D-sub connector kit, with cable (3 m)

SS5Q14-09FD2-D 1 set (F kit 9 station manifold base)

* SQ1140-5L0-C6 4 sets (2 position single)

* SQ1240-5L0-C6 4 sets (2 position double [latching])

* SSQ1000-10A-4 1 set (Blanking plate)

► The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

Add the valve and option part numbers in order starting from the first station on the D side. When entry of part numbers becomes complicated, indicate on the manifold specification sheet.

Series SQ1000

Kit (Flat ribbon cable connector)

- Simplification and labor savings for wiring work can be achieved by using a MIL type for the electrical connection.
- Using connector for flat ribbon cable (26P, 20P) conforming to MIL standard permits the use of connectors put on the market and gives a wide interchangeability.
- Top or side entry for the connector can be changed freely, allowing later changes according to the mounting space.

Manifold Specifications

	P	ications	Maximum number of

Manifold Option Parts for SQ1000

Blanking plate

SSQ1000-10A-4

It is used by attaching on the manifold block for being prepared for removing a valve for maintenance reasons or planning to mount a spare valve, etc.

TTT

SUP/EXH block

SSQ1000-PR-4-C8-□

Nil Standard
R External pilot specifications
S Built-in silencer

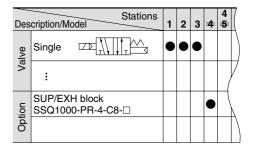

Note) When specifying both options, indicate "-RS".

 Specify the spacer mounting position on the manifold specification sheet.

For standard type manifolds, the SUP/EXH block is mounted on the D side.

It is added to the manifold to increase SUP/EXH capacity.

- * The number of SUP/EXH blocks that can be added is limited to two sets, one between manifold stations and another on the U side of the manifold, due to the length of the lead wire.
- * SUP/EXH blocks are not included in the number of manifold stations.

SSQ1000-P-4- C6 Port location

C6 Side ported
L6 Top ported

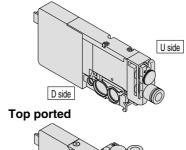

This is used as a supply port for different pressures when using different pressures in the same manifold (for one station). Both sides of the station which is used with supply pressure from the individual SUP spacer are shut off. (Refer to application example.)

 Specify the spacer mounting position and SUP passage shut off positions on the manifold specification sheet. Two shut off positions are required per unit.

(Two pieces of SUP block plate that shut off the supply pressure are included with the individual SUP spacer, therefore, it is not necessary to order them separately.)

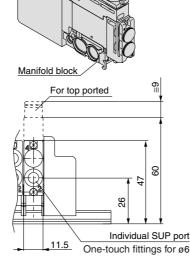

- Electrical wiring is also connected to the manifold station with the individual EXH spacer.
- * By changing the fitting shown in the drawing and the block plates, the spacer's specification can be changed later (from the individual SUP spacer to the individual EXH spacer).
- * The number of spacers is not limited when ordered with the manifold. However, when adding individual for F, P, and J kits, it is limited to two units, one between manifold stations and another on the U side, due to the length of the lead wire.
- * Model no with manifold block: SSQ1000-P-4- $_{

Side ported

One-touch fittings for ø6

Manifold Option Parts for SQ1000

SUP block plate

SSQ1000-B-P

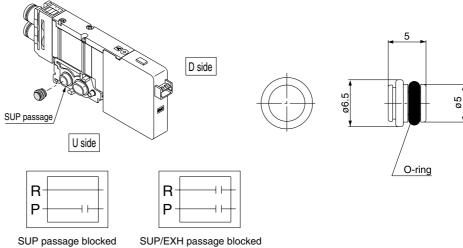

When supplying two different pressures, high and low, to one manifold, this is used between stations with different pressures. Also, it is used with an individual SUP spacer to shut off the air supply.

* Specify the station position on the manifold specification sheet.

<Shut off label>

When a SUP passage is shut off with a SUP block plate, a label is attached for external confirmation of the shut off position (one label each).

* Shut off labels are applied when SUP block plates are ordered with manifolds.

EXH block plate

SSQ1000-B-R

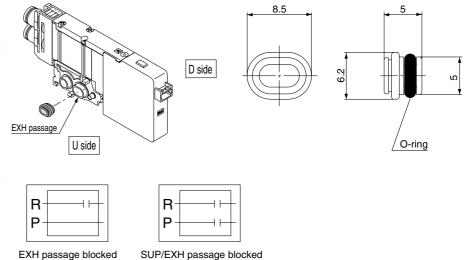

When the exhaust from a valve interferes with other stations in the circuit, this is used between stations to separate exhausts. Also, it is used with an individual EXH spacer to shut off the exhaust of individual valves.

* Specify the station position on the manifold specification sheet.

<Shut off label>

When an EXH passage is shut off with an EXH block plate, a label is attached for external confirmation of the shut off position (one label each).

* Shut off labels are applied when EXH block plates are ordered with manifolds.

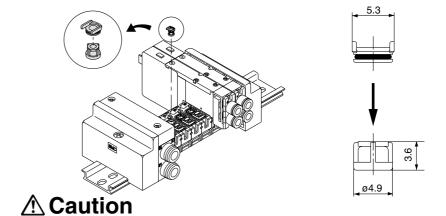

Back pressure check valve [-B]

SSQ1000-BP

This prevents cylinder malfunction caused by the exhaust from other valves.It is inserted into the R (EXH) port of the valve that is affected. It is especially effective when using single acting cylinders or exhaust center type solenoid valves.

- * When installing back pressure check valves only on the stations required, enter the part number and specify the station positions on a manifold specification sheet.
- * When installing back pressure check valves on all of the stations, indicate "-B" at the end of the manifold part number.

- Although the back pressure check valve is an assembly part with a check valve mechanism, a small amount of air leakage is allowed. Therefore, take care not to restrict the exhaust air from the exhaust port.
- The effective area of valves is about 20% less when the back pressure check valve is installed.
- 3. Since 4 port specification valves (5 (R1) and 3 (R2) are common) are used, back pressure cannot be prevented with dual 3 port valves.

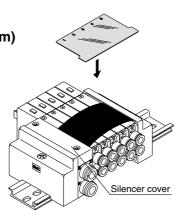

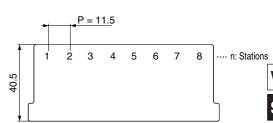

Name plate [-N]

SSQ1000-N3-Stations (1 to maximum)

This is a clear resin plate for applying solenoid valve function description labels, etc. To install, bend the plate slightly as shown and insert into the slots on the end plate side. Also, the plate is difficult to bend for manifolds with only a few stations, therefore, remove the silencer cover to install it.

* When ordering with manifolds, add "-N" at the end of the manifold number.

VQC

SQ

VQ0

VQ4

VQ5

Blanking plug (For One-touch fitting)

23 .04 .06 .08

This is inserted into cylinder ports and SUP and EXH ports that are not used.

Purchasing order is available in units of 10 pieces.

VQZ

VQD

Port plug

VVQZ100-CP

This is used to close the cylinder ports when changing a 5 port valve to a 3 port valve.

* Add "A" or "B" at the end of the valve part number when ordering with valves.

Example) SQ1141-5L-C6-A (N.O. specifications)

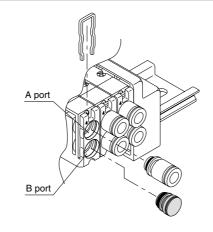

4 (A) port plug

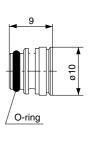

Example) SQ1141-5L-C6-B (N.C. specifications)

2 (B) port plug

Example) SQ1141-5L-C6-B-M

(B port plug with manifold block)

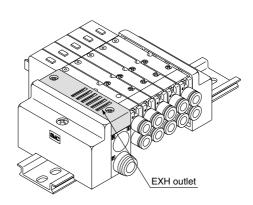

Direct EXH outlet, built-in silencer [-S]

The EXH outlet is placed on the top side of the manifold end plate. The built-in silencer provides highly effective noise reduction. (Noise reduction of 30 dB)

Note) Note that when excessive drainage occurs in the air supply, the drainage will be released along with the exhaust.

- * Add "-S" at the end of the manifold part number when ordering with manifolds.
- * For precautions on handling and how to replace elements, refer to page 2-3-5.

Manifold Option Parts for SQ1000

External pilot specifications [-R]

This can be used when the air pressure is 0.1 to 0.2 MPa lower than the minimum operating pressure of the solenoid valves or used for vacuum specifications.

Add "R" to the part numbers of manifolds and valves to indicate the external pilot specification.

An M5 port will be installed on the top side of the manifold's SUP/EXH block.

How to order valves (Example)

SQ1140 R -5L-C6

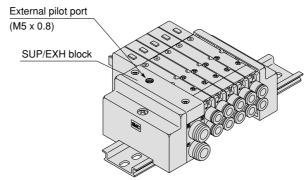

External pilot specifications

How to order manifold (Example)

* Indicate "R" for an option.

SS5Q14-08FD1-DR

External pilot specifications

Note 1) Not applicable for dual 3 port valves.

Note 2) Indicate "RY" for low wattage types.

Note 3) Valves with the external pilot specifications have a pilot EXH with individual exhaust specifications and EXH can be pressurized. However, the pressure supplied from EXH should be 0.4 MPa or lower.

Dual flow fitting

SSQ1000-52A-C8

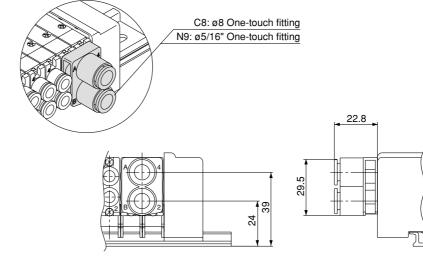

→Port size

C8	ø8
N9	ø5/16"

To drive a large bore cylinder, two valve stations are operated simultaneously to double the air flow. This fitting is used on the cylinder ports in this situation. Available sizes are Ø8 and Ø5/16" One-touch fitting.

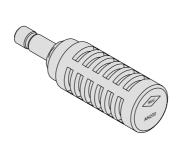

* When ordering with valves, specify the valve part number without One-touch fitting and list the dual flow fitting part number.

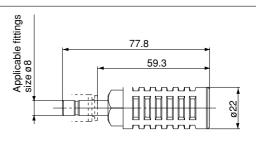

Example) Valve part number (without One-touch fitting part number)

Silencer (For EXH port)

This is inserted into the centralized type EXH port (One-touch fitting).

Specifications

Series	Model	Effective area (mm²) (Cv factor)	Noise reduction (dB)		
SQ1000	AN200-KM8	20 (1.1)	30		

Manifold Option Parts for SQ1000/SQ2000

Special Wiring Specifications

In the internal wiring of F kit, P kit, and J kit, double wiring (connected to SOL. A and SOL. B) is adopted for each station regardless of the valve and option types. Mixed single and double wiring is available as an option.

1. How to order

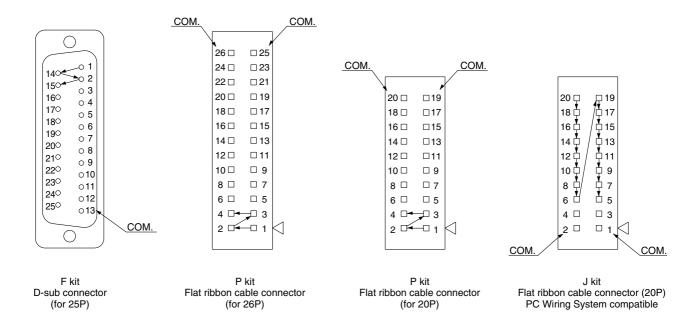

Indicate option symbol "-K" in the manifold part number and be sure to specify station positions for single or double wiring on the manifold specification sheet.

Example) **SS5Q14-09 FD0 - DKS**

Others, option symbols: to be indicated alphabetically.

2. Wiring specifications

Connector terminal numbers are connected from solenoid station 1 on the A side in the order indicated by the arrows without skipping any terminal numbers.

3. Maximum stations

The maximum number of manifold stations is determined by the number of solenoids. Count one point for a single solenoid type and two points for a double solenoid type. Determine the number of stations so that the total number of solenoids is no more than the maximum points in the table below.

Kit	F kit (D-sub connector)		P kit (Flat ribbon cable connector)					
Type FD□ 25P		PD□ 26P	PDC 20P	JD0 20P				
Max. points	24 points	24 points	18 points	16 points				

Special DIN Rail Length (DIN rail mounting (-D) only)

The standard DIN rail provided is approximately 30 mm longer than the overall length of the manifold with a specified number of stations. The following options are also available.

DIN rail length longer than the standard type (for stations to be added later, etc.)

In the manifold part number, specify "-D" for the manifold mounting symbol and add the number of required stations after the symbol.

Example) SS5Q14- 08FD0 - D09BNK

8 station manifold

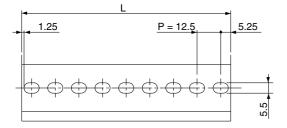

Option symbols (alphabetically)

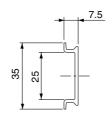

DIN rail for 9 stations

Ordering DIN rail only

DIN rail part number

AXT100- DR - n Note) For "n", enter a number from the "No." line in the table below. For L dimension, refer to the dimensions of each kit.

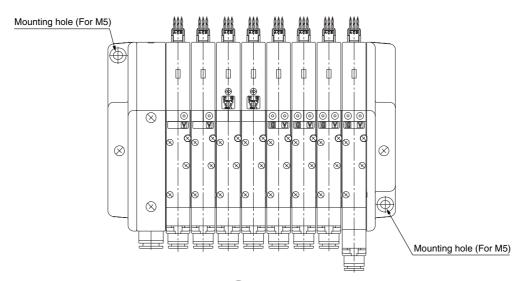

L Dimension L = 12.5 x n + 10.5

How to Add Manifold Stations for SQ1000/SQ2000

For F kit, P kit, J kit

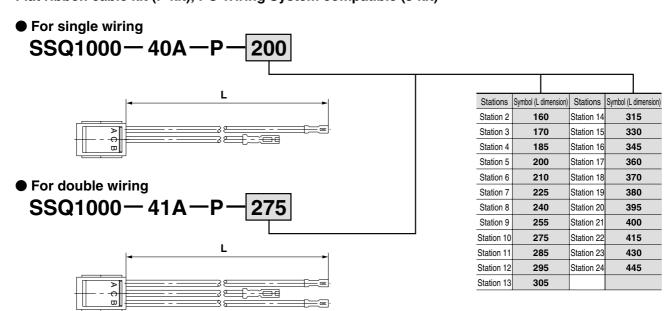

What to order: Lead wire assembly

SQ1000

D-sub connector kit (F kit)

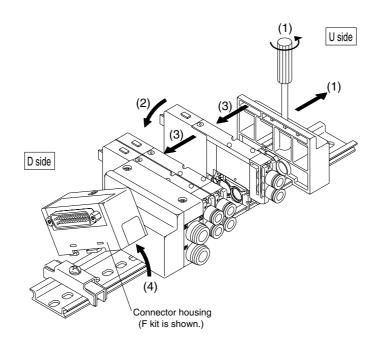

Flat ribbon cable kit (P kit), PC Wiring System compatible (J kit)

How to Add Manifold Stations for SQ1000/SQ2000

Steps for adding stations

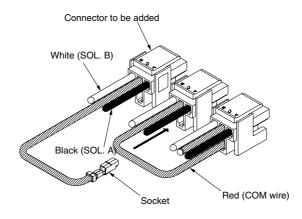

- (1) Loosen the clamp screw on the U side end plate and open the manifold.
- (2) Mount the manifold block or valve with manifold block to be added.
- (3) Press on the end plate to eliminate any space between the manifold blocks and tighten the clamp screw. | (Proper tightening torque: 0.8 to 1.0 N·m)
- (4) In the case of F kit, P kit or J kit, remove the connector housing from the DIN rail and connect the wiring.

2. Connection Method

(1) Connecting common wire

Insert the red lead wire (common wire) of the connector to be added into the adjacent connector as shown in the drawing below. After inserting,

VQC

SQ

VQ0

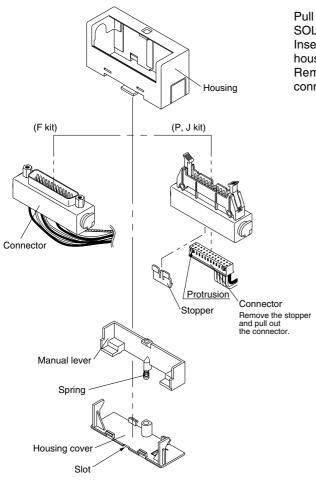

VQ4

VQ5

VQZ

	For 3P, Dual 3 port on A side		
(7)	For double (Double solenoid) on B side	VQ111(K) - 5 (N)J4	
<i>(</i>)	For 3P, Dual 3 port on B side	VQ111 _(Y) -6 (N)34	

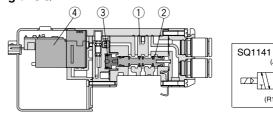

Note) Nil: Standard

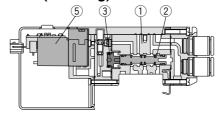

- B: Locking type manual override
- K : High pressure specifications (metal seal only)
- N : Negative common specifications Y : Low wattage specifications

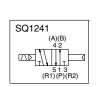

Rubber seal type

Single: SQ1141

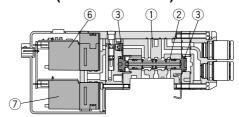

Double (Latching): SQ1241

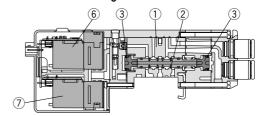

Double (Double solenoid): SQ1241D
