Manifold Electrical Wiring

10P/16P Flat Ribbon Cable Type (26 pins)

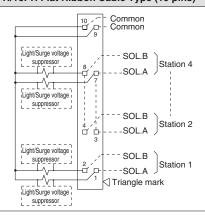

- This circuit has double wiring specifications for up to 12 stations. Since the usable number of solenoids differs depending on the manifold type, refer to the table below. In the case of single solenoids, connect to SOL. A. Furthermore, when wiring is specified on a manifold specification sheet, connections are made without skipping any connectors, and connections are made without skipping any connectors, and signals A for single and A, B for double are in order $1 \rightarrow 2 \rightarrow 3 \rightarrow 4$, etc.
 • Stations are counted from D side (connector side) as the 1st one.
- Since terminal numbers are not indicated on the flat cable, use the triangle mark as a reference for wiring.
- Since solenoid valves do not have polarity, either the +COM or -COM can

Type 10: Tie-rod Base Manifold

How to increase manifold bases (Type 10)

(1) Loosen the U side screws (a), and remove the SUP/EXH end block assembly (2).

(2) Screw in the tie-rods for station addition.

(Screw them in until there is no gap between the tie-rods.)

Tie-rod for station addition

(3) Connect the manifold assembly ① and supply/exhaust end block assembly ② to be added, and tighten the screws ⓐ.

▲ Caution Tightening torques ⓐ

SV1000, SV2000 0.6 N·m SV3000 1.4 N·m SV4000 2.9 N·m

Note) When eliminating manifold stations, the appropriate tie-rods (3) for the desired change should be ordered separately. (When equipped with a DIN rail, be sure to tighten the DIN rail holding screws after tightening the tension bolts.)

⚠ Caution

Fitting Assembly Replacement

By replacing manifold fitting assemblies, it is possible to change the size of the A, B ports and P, E ports. To replace them, remove the clip with a flat head screwdriver, etc., and pull out the fitting assembly.

Mount the new fitting assembly by inserting it and then replacing the clip to its fully inserted position.

For A, B port

 $SY9000 - 58A - {02}_{03}$

For P, E port

SY9000 - 58B - 03

Note 1) Be careful to avoid damage or contamination of O-rings, as this can cause air leakage.

Note 2) When removing a fitting assembly from a valve, after removing the clip, attach tubing or a plug (KQP-□□) to the One-touch fitting, and pull it out while holding the tubing (or plug). If it is pulled out while holding the release button of the fitting assembly (resin part), the release button may be damaged. However, 02 and 03 port block assemblies should be pulled out as they are.

■ How to order tie-rod type 10 solenoid valves with manifold block

[Series SV1000 to SV4000]

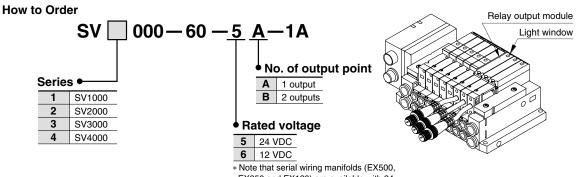

• Type with manifold block is used when adding stations, etc.

Manifold Option (Common for Type 16 and 10)

■ Relay output module

By adding a relay output module to a series SV manifold, devices up to 110 VAC, 3 A (large type solenoid valves, etc.) can be controlled together with Series SV valves.

* Note that serial wiring manifolds (EX500, EX250 and EX120) are available with 24 VDC only.

Relay Output Module Specifications

Item	-	Specific	cations		
No. of output points	1 output [connector	with lead wire (M12)]	2 outputs [connector with lead wire (M12)]		
	4 pins connector (M12) plug		4 pins connector (M12) plug	I	
Output type	1. — 2. Output A 3. — 4. Output A	2 1	1. Output B 2. Output A 3. Output B 4. Output A	2 1 0 3 3 4	
	Contact type ("a" contact)	Relay output module side pin arrangement	Contact type ("a" contact)	Relay output module side pin arrangement	
Load voltage	110 VAC	30 VDC	110 VAC	30 VDC	
Load current	3 A	3 A	0.3 A	1 A	
Indicator light	Ora	nge	A side: Orange	e B side: Green	
Enclosure		Based on IP	67 (IEC529)		
Current consumption		20 mA	or less		
Polarity		Non-	polar		
weight (g)		4	8		

■ Y type connector

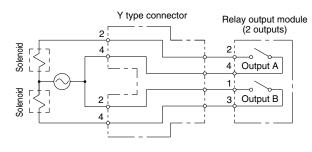

Used to branch a two output relay output module to two separate systems.

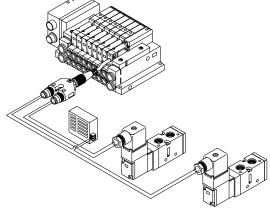

How to Order

EX500 - ACY00 - S

Relay output module and Y type connector wiring example

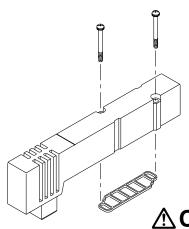

Manifold Option

■ Blanking plate assembly

Used in situations where valves will be added in the future.

Series	Blanking plate assembly part no.
SV1000	SV1000-67-1A
SV2000	SV2000-67-1A
SV3000	SV3000-67-1A
SV4000	SV4000-67-1A

Caution

Mounting screw tightening torques

M2: 0.15 N·m M3: 0.6 N·m M4: 1.4 N·m

■ SUP/EXH block disk

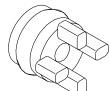

[SUP block disk]

By placing a SUP block disk in a manifold valve's pressure supply passage, two different high and low pressures can be supplied to one manifold.

[EXH block disk]

By installing an EXH block disk in a manifold valve's exhaust passage, the valve's exhaust can be separated so that it will not affect other valves. It can also be used on a manifold with mixed positive pressure and vacuum.

(Two pieces are required to block EXH on both sides. However, Series SV1000 and 2000 type 10 manifolds require only one piece.)

Cassette base type 16

Tie-rod base type 10

■ Label for block disk

These labels are attached to manifolds in which SUP and EXH block disks have been installed, in order to identify the installed locations. (Three sheets each included.)

* When a block disk is concurrently ordered by specifying on the manifold specification sheet, etc., a label will be stuck on the position where block disk is mounted.

■ Silencer with One-touch fitting

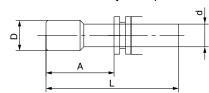

This silencer can be quickly mounted on the manifold's E (exhaust) port.

Manifold Option

■ Interface regulator How to order interface regulator

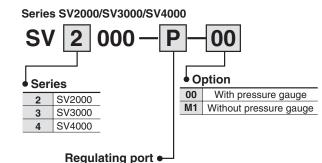

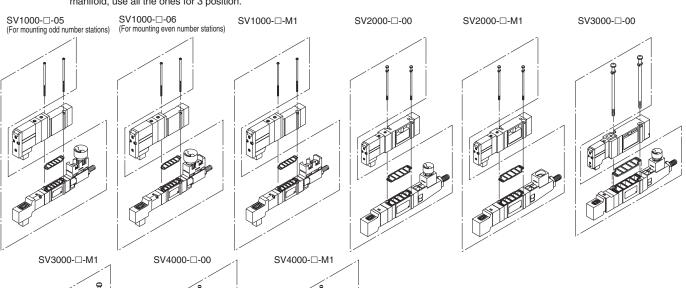

Р	P port
A1	A port (P controlled type, A port regulation)
B1	B port (P controlled type, B port regulation)

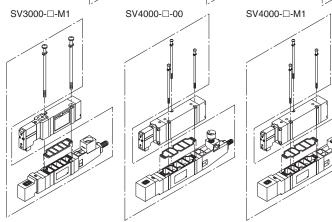

Note) In the case of Series SV1000 with a pressure gauge when mounting on the manifold, use caution that the part numbers are different between the odd no. stations and the even no. stations to avoid pressure gauges from interfering from each others.

Note) Use caution that the part numbers will be differed depending on the one for single/double and 3 position due to the different length of solenoid valves. Also, when at least the one for 3 position is included in the same manifold, use all the ones for 3 position.
