

3/5 Port Solenoid Valve Metal Seal/Rubber Seal Base Mounted **VQZ1000/2000/3000**

Compact design with large flow capacity

Body Width	Cv
10mm	0.2
15mm	0.6
18mm	0.9

High speed and Long life

Response time	Life
VQZ1000 10ms	} 2 million cycles*
VQZ2000 12ms	
VQZ3000 15ms	
Dispersion accuracy ± 2 ms	
* Metal seal, single solenoid with light and surge voltage suppressor	

Both 3 and 5 port valves can be mounted on the same manifold.

DIN rail mounting is available.

Built-in One-touch fittings for easier piping.

Integral One-touch fittings save on installation time and labor and can be easily removed if necessary.

Optional IP65 rated model is available with DIN connector.

Choice of metal or rubber seal main valve construction

Piping direction can be changed on VQZ100.

It's possible to change from side to top porting and vice versa.

Possible to have all solenoids on same side of manifold

Optional latching coil valve operates the same as a 2 position/ double solenoid valve but uses only one solenoid. This saves space and wiring costs.

		750														

Cylinder speed marked with "●" can be controlled by speed controller. (Pressure: 0.5 MPa, Load rate: 50%)

⚠️ Precautions

Be sure to read before handling. Refer to p.0-33 to 0-36 for Safety Instructions and common precautions.

⚠️ Warning

Manual Override

Without an electric signal for the solenoid valve the manual override is used for switching the main valve.

Non-locking push style (Flush)

Push down on the manual override button with a small screwdriver until it stops. Release the screwdriver and the manual override will return.

Locking style (Slotted)

Push down on the manual override button with a small screwdriver until it stops. While down, turn clockwise by 90° to lock it. Turn it counterclockwise to release it.

⚠️ Caution

How to Use L and M Plug Connector

Insertion/Removal of connector

M plug connector

Insertion:
Push the connector straight onto the pins of the solenoid, making sure the lip of the lever securely "locks" into the groove of the solenoid cover.

Removal:
Press the lever against the connector housing and pull it outward from the solenoid.

L plug connector

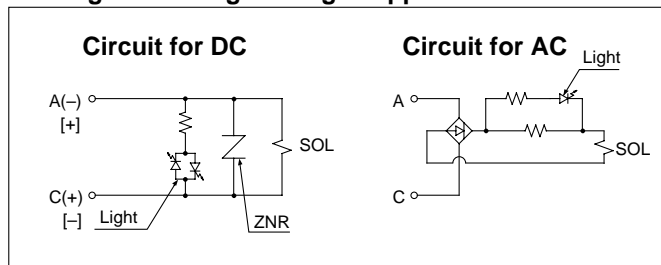

Refer to p.1.12-59 for part no. of plug connector ass'y.

Connection and Electrical Circuit

The VQZ series features non-polar solenoids.

With light and surge voltage suppressor

Due to the use of non-polar light, the VQZ series has no polarity. Refer to p.1.12-57 for latching style.

⚠ Precautions

Be sure to read before handling. Refer to p.0-33 to 0-36 for Safety Instructions and common precautions.

Connection of Lead Wire

(Not necessary if ordering the lead wire pre-connected model.)

Crimping connection of lead wire and socket

Strip 3.2 to 3.7mm of the lead wire ends, insert each stripped wire into a socket and crimp contact it using special crimping tool. Be careful that the outer insulation of the lead wires does not interfere with the socket contact part.

Tool for crimping: Model No. DXT170-75-1

Connection/Disconnection of socket with lead wire

Connection

Insert lead wire and crimped socket into square holes (indicated as A, B, COM) of connector. Press the socket in fully until the hook of the socket locks into the groove of the connector housing. Confirm the locked position by lightly pulling on the lead wire.

Disconnection

To remove the socket from the connector, pull out lead wire while depressing the hook of the socket with a fine screw driver (or similar). If the socket is to be re-used, reposition the hook again.

How to Wire the DIN Connector

Conforming to ISO#: DIN 43650 C (8mm between pins)

Cut the power and air supply before mounting/removing the connector.

- ① Loosen the top screw and remove the connector housing from the terminal spades on the solenoid.
- ② Remove the housing screw and insert a screwdriver into the slot area on the underside of the DIN cap and carefully separate block and housing.
- ③ Loosen the terminal screws of the block and insert stripped lead wires in accordance with the wiring diagram. Secure each wire by retightening the terminal screw.
- ④ Tighten the housing grommet nut to secure the cable wire.

Change of electrical entry (orientation)

Once the housing is separated from the terminal block, it can be rotated in any direction to change the orientation of the electrical entry.

* In the case of the indicator light option, avoid damaging the light with the lead wire connections.

Precaution

Pull connector out vertically, never at an angle.

Applicable cable

Cord O.D.: $\varnothing 3.5$ to $\varnothing 7$

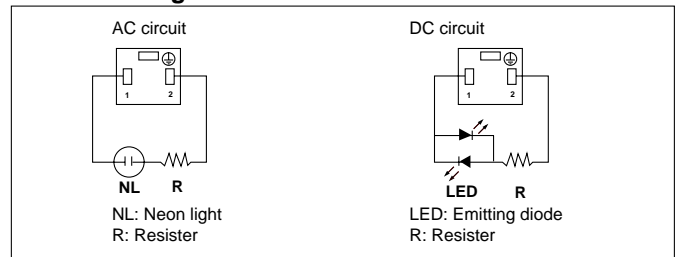

(Reference) 0.5mm² 2-core and 3-core wires equivalent to JISC3306.

Part No. of DIN Connector (Based on DIN)

Without light		AXT100-20-1
With light		
Rated voltage	Voltage symbol	Part No.
24V DC	24V	AXT100-20-2-05
12V DC	12V	AXT100-20-2-06
100V AC	100V	AXT100-20-2-01
200V AC	200V	AXT100-20-2-02
110V AC	110V	AXT100-20-2-03
220V AC	220V	AXT100-20-2-04

Circuit with light

⚠ Caution

Mounting 3 Port Valves on 5 Port Manifolds (VQZ $\frac{1}{2}$ 85 $\frac{1}{2}$, N.C./VQZ $\frac{1}{2}$ 95 $\frac{1}{2}$, N.O.)

When a 3 port valve is mounted on a 5 port manifold, the "A" port is the working port. The "B" port can either be plugged or unplugged.

When port plug is used on B port, indicate "CM" in manifold part no. and port size, and specify the port plug location in manifold specification form.

Changing the One-touch Fittings

The built-in fittings on the manifold can be changed easily. Simply remove the corresponding valve and take out the fitting clip underneath. Then remove the affected fitting and replace with a new one. Finally, replace the fitting clip and remount the valve.

Precaution

When pulling the fitting ass'y away from the manifold base, remove the clip, then connect a tube or plug (KQP-□□) with the One-touch fitting and pull out it holding the tube or plug. Do not hold the release bushing to avoid damage.

DIN Rail Removal/Mounting

To remove manifold from DIN rail:

- 1) Loosen the clamp screw on the "A" side of both ends of the manifold.
- 2) Lift the "A" side of the manifold off the DIN rail and slide it in the direction of the "B" side.

Mounting manifold to DIN rail:

- 1) Catch the hook of the DIN rail bracket on the "B" side on the DIN rail.
- 2) Push side "A" onto the DIN rail and tighten the clamp screw. (Tightening torque of 0.3 to 0.4 Nm{3 to 4kgf/cm})

Valve Mounting

After confirming the gasket is correctly placed under the valve, tighten the mounting screws with the appropriate torque listed below.

Model	Suitable tightening torque
VQZ1000	0.18 to 0.25Nm
VQZ2000	0.25 to 0.35Nm
VQZ3000	0.5 to 0.7Nm

How to Order Valve Manifold Assembly (Example)

VV5QZ25-05C6C.....1 set (C kit 5 stations manifold base)

- *VVQZ2000-10A-5...1 set (Blank plate assembly)
- *VQZ2150-5L1 set (Valve P/N – single solenoid)
- *VQZ2250-5L2 set (Valve P/N – double solenoid)
- *VQZ2350-5L1 set (Valve P/N – 3 position)

→ Prefix "*" mark to valves etc. to be assembled on the manifold.

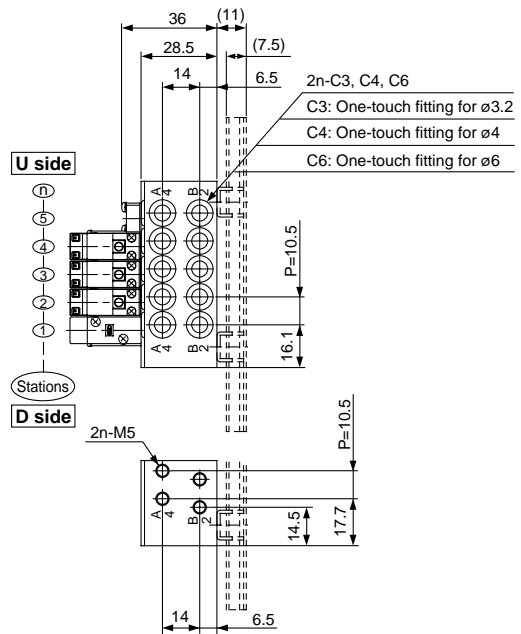

→ Write sequentially from the 1st station on the D side.

Add valve suffix and option numbers to the manifold base number.
When part numbers written collectively are complicated, specify by using a manifold specification form.

<Examples>

Caution

- Since air leakage from the pipe between the valve and cylinder or the fittings will prevent the cylinder from stopping for a long time. Check for air leakage using neutral household detergent, such as dish washing soap. Also check the cylinder's tube gasket, piston seal and rod seal for leakage.
- Since slight air leakage from One-touch fittings is allowed, use of a piping screw (with M5 thread) is recommended when stopping the cylinder in the middle for a long time.
- Combining double check block with 3 position closed center or pressure center solenoid valve will not work.
- A M5 fitting assembly is attached, without being incorporated in the double check block. After screwing in the fittings, mount the ass'y on the double check block. (Tightening torque: 0.8 to 1.2 Nm)
- If exhaust side of double check block is narrowed down so much, this decreases the intermediate stop accuracy.

<Examples>

Caution

- Since air leakage from the pipe between the valve and cylinder or the fittings will prevent the cylinder from stopping for a long time. Check for air leakage using neutral household detergent, such as dish washing soap. Also check the cylinder's tube gasket, piston seal and rod seal for leakage.
- Since slight air leakage from One-touch fittings is allowed, use of a piping screw (with M5 thread) is recommended when stopping the cylinder in the middle for a long time.
- Combining perfect block with 3 position closed center or pressure center solenoid valve will not work.
- When screwing the fittings in the double check block, applied torque is as shown below:

Thread	Torque Nm
Rc(PT)1/8	7 to 9
Rc(PT)1/4	12 to 14

- Set the cylinder load so that the cylinder pressure will be within two times that of the supply pressure.
- If exhaust side of double check block is narrowed down so much, this decreases of the intermediate stop accuracy.

Compact Body Style with Built-in Speed Controller: For VQZ2000 Only

- Speed controllers are built-in to the valve body, making it easier to adjust cylinder speed.
- Needle valve is equipped with a retainer to prevent accidental needle loss.

symbol

(Single)

- Note 1) Valve with built-in speed controls is available on rubber seal models only.
- Note 2) Compact body valves and standard valves are not interchangeable. Compact valves cannot be mounted on a standard manifolds and vice versa.
- Note 3) Tightening torque of needle valve lock nut should not exceed 0.3Nm.

One Side Solenoid (Latching Solenoid)

The standard 2 position double solenoid valve has two solenoids, one on each end of the valve body. The latching solenoid option (with self holding mechanism) functions in the same manner as a 2 position double solenoid but uses only one solenoid to do the job.

Existing model

Latching solenoid

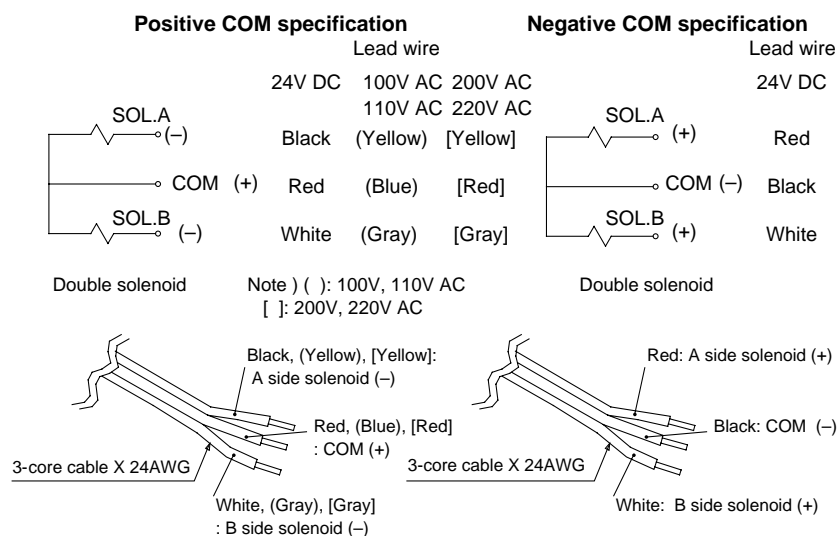

How to Order Latching Solenoid Valve

Note 1) Specifications are same as standard except for the function.
 Note 2) K (High pressure style) and Y (Low wattage style) are not available.

Wiring

Lead wires are connected to the valve as shown below. Connect them with the power supply.

Electrical Circuit

Latching solenoid (DC)

Latching solenoid (AC)

Note 1) ·Set side in energized state: Lighting (Orange)
 ·Reset side in energized state: Lighting (Green)
 ·With miss-wiring preventing function (Stop diode)
 ·With surge absorption function (ZNR/Surge absorption diode)
 Note 2) Flow direction: P→A (A (set) side in energized state)
 Flow direction: P→R (B (reset) side in energized state)
 Note 3) Negative COM specification available.

⚠ Caution

Cautions for Latching Use

1. Use a circuit in which the ON and OFF signals are not simultaneously energized.
2. Minimum energization time for self holding is 20ms.
3. Avoid using the latching solenoid valves in environments where impact or collisions with the valve might occur. Also, do not use in places where a strong magnetic fields are present.
4. The armature in the solenoid is set in the B side ON position (Reset) at the factory. However, shifting of the armature might occur during shipping so please confirm the position by energizing the solenoid.
5. Please consult SMC for extended energization applications.

Manual Override

The manual override is on the pilot valve for latching solenoid valves.

·To lock in set position (Flow path: P→A):
 Turn the manual override clockwise by 180° to mark A press down. Valve is now locked in the set condition. (Flow path: P→A)
 ·To reset (Flow path: P→B):
 Turn manual override counterclockwise to mark B and press down. Valve will then be in the reset condition. (Flow path: P→B).

Options

External Pilot Specifications

The external pilot specification must be used when the operating pressure is below the minimum operating pressure 0.1 to 0.2 MPa or when valve is being used for a vacuum application. For the external pilot valve, an "R" should be attached to the valve and the manifold part number. (See the below.)

Example/Valve

VQZ2150R – 5M – 02

External pilot specification

Example/Manifold

VV5QZ25 – 06C6C – R

External pilot specification.

Pressure Specifications

Series		VQZ1000, 2000, 3000		
		2 position single	2 position double	3 position
External pilot pressure range*	Metal seal	0.1 to 0.7 MPa Only VQZ3000, 3 position 0.15 to 0.7MPa		
	Rubber seal	0.15 to 0.7MPa	0.1 to 0.7MPa	0.2 to 0.7MPa
Operating pressure range*		Vacuum to 0.7MPa		

* In case of the high pressure style, upper limit of max. operating pressure and external pilot pressure range is 1MPa.

Inch Size One-touch Fittings and Option Thread

—	No (Standard)
W ⁽¹⁾	IP65 reted

Note 1) The pilot exhaust of the IP65 valves is common with main valve exhaust. (The standard valve has an individual exhaust for the pilot valve.)

Series VQZ Base Mounted

Replacement Parts

One-touch Fitting Assembly (For cylinder port)

Fitting Size	C3	C4	C6	C8	C10
VQZ1000	VVQ1000-50A-C3	VVQ1000-50A-C4	VVQ1000-50A-C6	—	—
VQZ2000	—	VVQ1000-51A-C4	VVQ1000-51A-C6	VVQ1000-51A-C8	—
VQZ3000	—	—	VVQ2000-51A-C6	VVQ2000-51A-C8	VVQ2000-51A-C10

Note) Order is accepted in 10 units.

<Plug connector assembly>

DC (+COM)

• Single

AXT661-14A-□

• Latching

AXT661-13A-□

DC (-COM)

• Latching

AXT661-13AN-□

100V, 110V AC

• Single

AXT661-31A-□

• Latching

AXT661-32A-□

200V, 220V AC

• Single

AXT661-34A-□

• Latching

AXT661-35A-□

Only connector and sockets (3 pcs.)

AXT661-12A

Lead wire length

—	300mm
6	600mm
10	1000mm
20	2000mm
30	3000mm

Standard wire length of valve with plug connector is 300mm.

When requiring valve with 600mm length lead wire specify the model number of valve without plug connector and plug connector assembly.

<Gasket and screw assembly>

	Part No.
VQZ1000	VQZ1000-GS-5
VQZ2000	VQZ2000-GS-5
VQZ3000	VQZ3000-GS-5

Note) Above part number consists of 10 units. Each unit has one gasket and two screws. Orders are accepted in 10 units.

Series

1	VQZ1000, 2000, 3000
---	---------------------

Function

Symbol	Specification	DC	AC
—	Standard	(1.0W) ○	○
K ⁽¹⁾	High pressure (Metal seal)	(1.0W) ○	—
Y	Low wattage	(0.5W) ○	—
L ⁽³⁾	Latching	(1.0W) ○	○

Note 1) Option
Note 2) When specifying more than one option, please indicate them alphabetically.
Note 3) K (High pressure) and Y (Low wattage) are not available.
Electrical entry: L/ M plug connector only.

Applicable model

—	VQZ2000, 3000
4	A and B side of VQZ1000 single double solenoid type A side of VQZ1000 3 position
5	B side of VQZ1000 3 position

Electrical entry

G	Grommet (DC specification)
L ⁽¹⁾	L plug connector with lead wire
LO ⁽¹⁾	L plug terminal without connector
M ⁽¹⁾	M plug connector with lead wire
MO ⁽¹⁾	M plug terminal without connector
Y ⁽²⁾	DIN connector
YO ⁽²⁾	DIN terminal without connector
YZ ⁽²⁾	DIN connector
YOS ⁽²⁾	DIN terminal without connector

Note 1) L, LO, M and MO types are attached with light and surge voltage suppressors as standard.
Note 2) DIN style is applicable to VQZ2000, 3000.

Coil voltage

1*	100V AC (50/60Hz)
2*	200V AC (50/60Hz)
3*	110V AC (50/60Hz)
4	220V AC (50/60Hz)
5	24V DC
6	12V DC
9*	Others

* Consult SMC when requiring grommet style, AC specification and others.

<Sub-plate>

Model	Sub-plate part No.
VQZ1000	VQZ1000-S-01
VQZ2000	VQZ2000-S-01 [Rc1/8] 02 [Rc1/4]
VQZ3000	VQZ3000-S-02 [Rc1/4] 03 [Rc3/8]
