Note 1) Use dry air to prevent condensation when operating at low temperatures.

Note 2) Shock resistance : No malfunctions resulted from the impact test using a drop impact tester. The tests were performed on the axis and right angle direction of the main valve and armature, for both energized and de-energized states. (Value in the initial stage.)

Vibration resistance: No malfunctions occurred in a one-sweep test between 8.3 and 2,000 Hz. Tests were performed at both energized and de-energized states on the axis and right angle direction of the main valve and armature. (Value in the initial stage.)

## How to Order Manifold Assembly (Example)

**VV3QZ22-05C** ..... 1 set (C kit 5 stations manifold base)

\* **VVQZ200-10A-2** ... 1 set (Blank plate assembly)

\* **VQZ212-5M-C6** ... 4 sets (N.C. style)

→ Prefix "\*" mark to valves etc. to be assembled on the manifold.

→ Write sequentially from station 1 on the D side.

Add the suffix valve and option part numbers to the manifold base number. Part numbers written collectively can be complicated, thus specify by using a manifold specification form.

## External Pilot Specification

The external pilot specification is used when the operating pressure is below the minimum operating pressure 0.1 to 0.2MPa or when valve is used for a vacuum application.

For the external pilot valve, an "R" should be attached to the valve and the manifold part number.

Example/Valve

**VQZ212R — 5M — C6**

External pilot specification

## Pressure specifications

Series		VQZ100 <sup>(2)</sup>	VQZ200, VQZ300
External pilot pressure range	Metal seal	—	0.1 to 0.7MPa
	Rubber seal (1) (VQZ100: Poppet)	0.2 to 0.7MPa	0.15 to 0.7MPa
Operating press. range (1)		Vacuum to 0.7MPa	

- Note 1) In case of the high pressure style, the upper limit of max. operating pressure and external pressure range is 1MPa.  
 Note 2) If VQZ100 is applied in vacuum, vacuum from P port. When finishing the vacuum application, supply pressure from R port. Make sure that the supply pressure is less than half of the external pilot pressure.

## Inch Size One-touch Fittings and Optional Thread

Manifolds are available with inch size one-touch fittings and NPT, NPTF or PF type threads.
