3-Screen Display
High-Precision Digital Pressure Switch

While checking the measured value, setting is possible.

Main screen: Measured value (Current pressure value)
Sub screen: Label (Display item), Set value (Threshold value)

Visualisation of Setting Items
- Set value (Threshold value)
- Peak value
- Hysteresis value
- Bottom value
- Delay time

Delay Time Fastest 1.5 ms* or less
*Select from 1.5 ms or less, 20 ms, 100 ms, 500 ms, 1000 ms, 2000 ms or 5000 ms.

Current Consumption 25 mA* or less
*Reduced by approx. 60 % in power saving mode.

Improved Operability
With a snapshot function for measured value reading

Pressing the Snap shot function buttons for a minimum of 1 second will make the set value (threshold value) the same as the current pressure value.

3 Setting Modes Page 2
1. 3 Step Setting Mode
2. Simple Setting Mode
3. Function Selection (detailed setting) Mode

Series ZSE20(F)/ISE20

CAT.EUS100-114A-UK
**Improved Operability**

**Visualisation of Setting Items**

Sub screen (label) shows the item to be set.

Always displayed in one screen.

**Mode Examples**

<table>
<thead>
<tr>
<th>Hysteresis mode</th>
<th>Window comparator mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal output</td>
<td>Normal output Lo side</td>
</tr>
<tr>
<td>Set value (Threshold value)</td>
<td>Set value (Threshold value)</td>
</tr>
<tr>
<td>Reversed output</td>
<td>Reversed output Lo side</td>
</tr>
<tr>
<td>Hysteresis</td>
<td>Hysteresis Lo side</td>
</tr>
<tr>
<td>Set hysteresis value</td>
<td>Set hysteresis Lo side</td>
</tr>
</tbody>
</table>

**Simple 3 Step Setting**

When S button is pressed, and the set value (P_1) is being displayed, the set value (Trigger level) can be set. When S button is pressed, and the hysteresis (H_1) is being displayed, the hysteresis can be set.

**Easy Screen Switching**

Setting is possible while checking the measured value. The sub screen can be switched by pressing up/down buttons.

One arbitrary display mode can be added by setting the function. (Refer to page 3.)
3 Setting Modes

Setting mode can be selected according to the purpose.

3 Step Setting Mode
- Threshold value setting or
- Hysteresis value setting

Simple Setting Mode
- Threshold value setting
- Hysteresis value setting
- Delay time selection

Function Selection Mode
- Output mode selection
- Selection of normal or reversed
- Threshold value setting
- Hysteresis value setting
- Delay time selection
- Display colour selection

1. **Mode selection**
   - Press the button once.

2. **Output mode selection**
   - Select from:
     - Hysteresis mode
     - Window comparator mode
     - Error output
     - Output OFF.

3. **Selection of normal or reversed**
   - Select from:
     - Normal output
     - Reversed output.

4. **Set value (Threshold value) setting**
   - Adjust the numerical value.

5. **Hysteresis value setting**
   - Adjust the numerical value.

6. **Delay time selection**
   - Select from:
     - 1.5 ms or less
     - 20 ms 100 ms 500 ms
     - 1000 ms 2000 ms 5000 ms.

7. **Display colour selection**
   - Select from:
     - ON OFF
     - ON OFF
     - Normally OFF Normally

High-Precision Digital Pressure Switch

3-Screen Display

Press the button between 1 and 3 seconds.

Press the button between 3 and 5 seconds.
Other Sub Screen Display

Peak value or bottom value; or both values can be displayed in one screen!

* Peak and bottom values are maintained even if the power supply is cut.

**Combination of the displays shown above and the set values can be displayed on the sub screens on both sides.

Convenient Functions

- **Secret code setting function**
  The key locking function keeps unauthorised persons from tampering with buttons.

- **Power saving function**
  Power consumption is reduced by turning off the monitor. (Reduce power consumption by approx. 60 %.)

- **Resolution switch function**
  It reduces the monitor to flicker.

  0.5000 MPa

  0.5000 MPa

  1/1000
  (Accuracy is not changed, only the displayed values.)

- **MPa/kPa switch function**
  Vacuum, compound and/or positive pressure can be displayed in MPa or kPa.

  0.5000 MPa

  500.00 kPa

  1/100

Compact & Lightweight

- **Compact: 17.5 mm shorter** (When M5 female thread is used.)
- **Lightweight: 21 g lighter** (When M5 female thread is used.)
- **13 g lighter** (When R 1/8 is used.)
Mounting

Bracket configuration allows mounting in four orientations.

Bracket A

Bracket B

### Cable Specifications

- **Conductor area**: 0.15 mm² (AWG26)
- **Insulator**: Outside diameter 1.0 mm
- **Colour**: Brown, Blue, Black (3 cores)
- **Sheath**: Heat resistant diameter Ø 3.4
Set Pressure Range and Rated Pressure Range

Set the pressure within the rated pressure range.
The set pressure range is the range of pressure that is possible in setting.
The rated pressure range is the range of pressure that satisfies the specifications (accuracy, linearity, etc.) on the switch.
Although it is possible to set a value outside the rated pressure range, the specifications will not be guaranteed even if the value stays within the set pressure range.

For vacuum pressure

Rated pressure range of switch: −100 kPa to 0 MPa
Set pressure range of switch: −101 kPa to 0 kPa

For compound pressure

Rated pressure range of switch: −105 kPa to 1 MPa
Set pressure range of switch: −105 kPa to 1 MPa

For positive pressure

Rated pressure range of switch: 0 kPa to 1.05 MPa
Set pressure range of switch: 0 kPa to 1.05 MPa

Functions

Sub screen setting function
The display of the sub screen can be selected.

Auto-preset function
This function is to calculate a rough set value automatically based on the on-going operation.

Display value fine adjustment function
Evens out deviations in the displayed value.

Peak value indication function
Can retain the maximum pressure value displayed during measurement.

Bottom value indication function
Can retain the minimum pressure value displayed during measurement.

Keylock function (Selectable secret code)
The keyboard can be locked to prevent any incorrect function of the operation switch.

Zero-clear function
The pressure display can be set at zero when the pressure is open to the atmosphere.

Error indication function
This function is to display error location and content when a problem or error has occurred.

Anti-chattering function
Prevents possible malfunction due to sudden fluctuations in the primary pressure by adjusting the delay time.

Unit selection function
Can convert the display value.

Power saving mode
Reduces power consumption.

Display resolution switch function
Converts display resolution from the normal value of 1/1000 to 1/100.

kPa ↔ MPa switch function
Converts the unit between kPa and MPa.

Series ZSE20(F)/ISE20

Function Details

A Auto-preset function (F4)
Auto-preset function, when selected in the initial setting, calculates and stores the set value from the measured pressure. For example, if this function is used for suction verification, the optimum set value is determined automatically by repeating vacuum and break with the target workpiece several times.

B Display value fine adjustment function (F6)
Fine adjustment of the indicated value of the pressure sensor can be made within the range of ±5 % of the read value. (The scattering of the indicated value can be eliminated.)

C Peak/Bottom value indication function
This function constantly detects and updates the maximum (minimum) pressure when the power is supplied, and allows to hold the maximum (minimum) pressure value.

D Keylock function
Prevents operation errors such as accidentally changing setting values.

E Zero-clear function
This function clears and resets the zero value on the display of measured pressure. The indicated value can be adjusted within ±7 % F.S. of the pressure when ex-factory. (ZSE20F for compound pressure) ±3.5 % F.S.)

F Error indication function
This function is to display error location and content when a problem or error has occurred.

</tr>
</tbody>
</table>

If the error cannot be reset after the above measures are taken, or errors other than above are displayed, please contact SMC.

The F□ in ( ) shows the function code number. Refer to the Operation Manual for details about operation procedures and function codes.
G Anti-chattering function (Simple setting mode or F1)
A large bore cylinder or ejector consumes a large volume of air in operation and may experience a temporary drop in the supply pressure. This function prevents detection of such temporary drops in the supply pressure as an error by changing the delay time setting.

<table>
<thead>
<tr>
<th>Available delay time settings</th>

</tbody>
</table>

<Principle>
This function averages pressure values measured during the response time set by the user and then compares the average pressure value with the pressure set point value to output the result on the switch.

H Unit selection function (F0)
Display units can be switched with this function.

<table>

*The ZSE20 (vacuum pressure) and ZSE20F (compound pressure) will have different setting and display resolution when the unit is set to MPa.

I Power saving mode (F80)
Power saving mode can be selected.
It shifts to the power saving mode without button operation for 30 seconds.
It is set to the normal mode (Power saving mode is OFF.) when ex-factory.
(During power saving mode, [ECo] will flash in the sub screen and the operation light is ON (only when the switch is ON).)

J Setting of secret code (F81)
Users can select whether a secret code must be entered to release key lock.
At the time of shipment from the factory, it is set such that the secret code is not required.
**Safety Instructions**

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)+1, and other safety regulations.

**Caution:**
1. The product is provided for use in manufacturing industries.
2. Only personnel with appropriate training should operate machinery and equipment.
3. Do not service or attempt to remove product and assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.
4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions. 1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight. 2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue. 3. An application which could have negative effects on people, property, or animals requiring special safety analysis. 4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

**Warning:**
1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications. Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.
2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue. 3. An application which could have negative effects on people, property, or animals requiring special safety analysis. 4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

**Danger:**
1. The product is provided for use in manufacturing industries.
2. Only personnel with appropriate training should operate machinery and equipment.
3. Do not service or attempt to remove product and assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.
4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions. 1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight. 2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue. 3. An application which could have negative effects on people, property, or animals requiring special safety analysis. 4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

**Limited warranty and Disclaimer/Compliance Requirements**

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”. Read and accept them before using the product.

**Limited warranty and Disclaimer**

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first. Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.

**Compliance Requirements**

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

**Safety Instructions**

Be sure to read “Handling Precautions for SMC Products” (M-E03-3) before using.
