Capable of air cylinder multipoint positioning and control

Air Servo Cylinder
IN-777

- Repeatability for the stopping position: ±0.5 mm
- Servo valve and controller integrated cylinder
  Built-in position sensor
  The servo valve controls the flow rate on the cylinder head side and the rod side.

- IP67
- Ambient temperature: −20°C to 60°C (No freezing)
- Applicable to cylinders with diameters of Ø125 to Ø400
- Input signal: 4 to 20 mA
- With stroke position signal output function (4 to 20 mA)
- HART transmission
- With auto calibration function
- Supports the fail safe function

The application described here is for reference only and performance is not guaranteed. For actual usage in various other applications, please conduct thorough evaluation and validation testing in order to determine the feasibility under your actual usage conditions. Furthermore, please contact your local SMC sales representative for individual pricing and delivery verification.
