

Proposal for CO₂ Emission-reducing Products

An introduction to products that can contribute to energy saving and CO₂ emission-reduction through centralized control, air saving, compactness, and weight reduction

By using compact, lightweight products, you can **minimize the size and weight of devices!**

CO₂ emission reduction

By using compact products, you can **make efficient use** of factory space!

By using lightweight products, you can reduce tact time and **improve productivity!**

Improved energy utilization efficiency by saving air leads to **compressor optimization**

By using topology optimization^{*1} in the designing process, energy saving, compactness, and weight reduction can be achieved. In addition, visualization allows for optimization via centralized control.

■ Centralized data control of line pressure and equipment air consumption

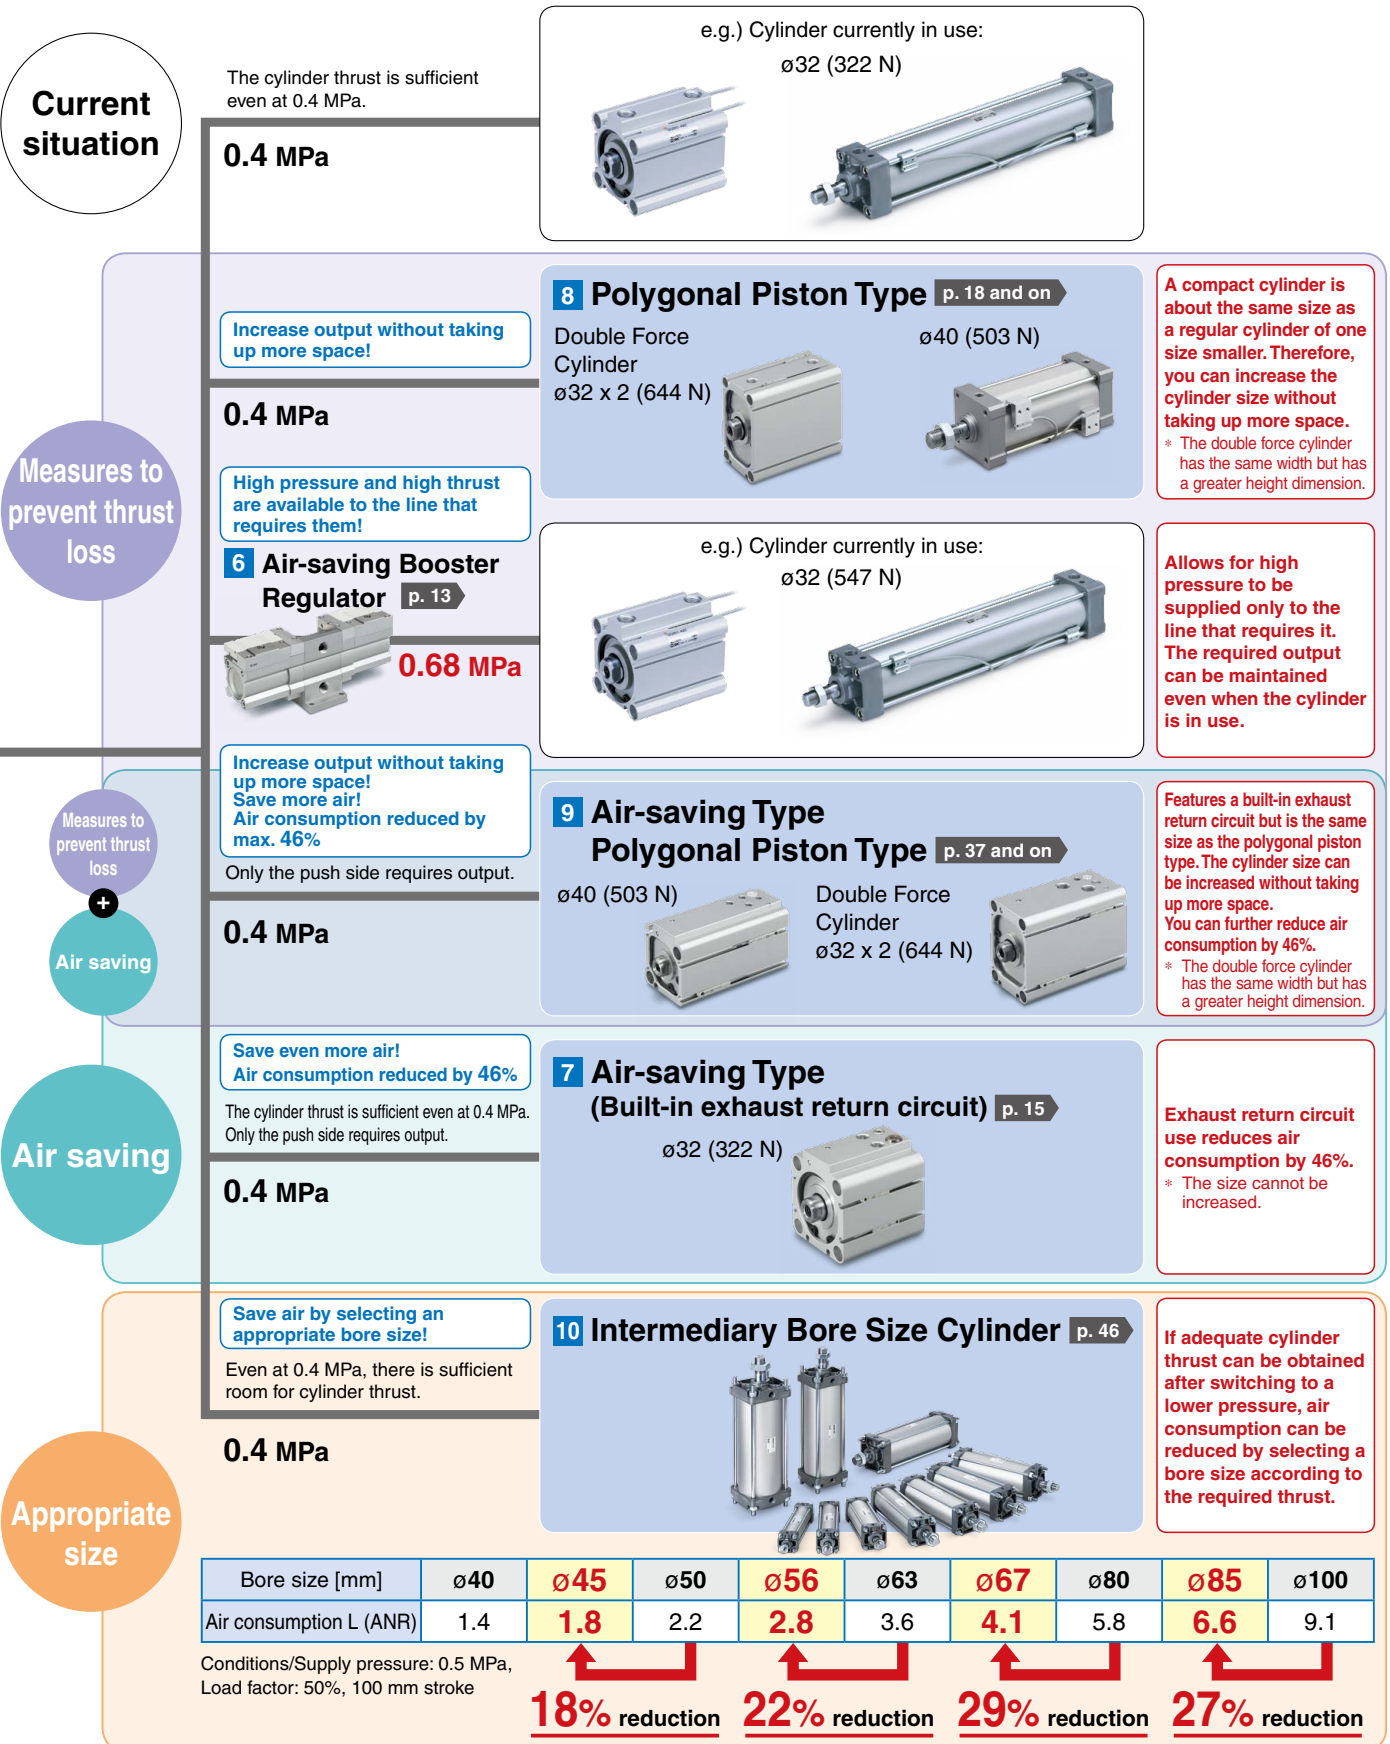

In order to calculate the amount of air being consumed by an air pressure system and to measure the effectiveness of energy-saving measures, the flow rate and pressure must be controlled. To maintain and monitor the effectiveness of these measures, it is recommended that the flow rate and pressure measurement data of each device be centrally controlled.

*1 Topology optimization is the methodology of finding the most efficient design for an object on a mathematical and mechanical basis.

SMC offers a lineup of products which can aid you in eliminating partial losses of thrust and in reducing air consumption.

An effective way to reduce air consumption is to lower the supply pressure of a compressor, called pressure reduction. While this approach is both easy and immediate, from the customer's perspective, a partial loss of supply pressure to machine equipment could interfere with production.

High-Precision Digital Pressure Switch ZSE20B(F)-L/ISE20B-L

IP65

- IO-Link version: V1.1
- Process data length: 2-byte input
- Transmission speed: COM2 (38.4 kbps)
- Minimum cycle time: 2.3 ms

Series	Applicable fluid	Type	Rated pressure range
ZSE20BF-L	Air	Compound pressure	-100 to 100 kPa
ZSE20B-L	Air	Vacuum pressure	0 to -100 kPa
ISE20B-L	Air	Positive pressure	0 to 1 MPa

High-Precision Digital Pressure Switch ISE7□/7□G

IP67

- IO-Link version: V1.1
- Process data length: 2-byte input
- Transmission speed: COM2 (38.4 kbps)
- Minimum cycle time: 2.3 ms
- IO-Link port type: Class A

Series	Applicable fluid	Type	Rated pressure range
ISE70	Air	Positive pressure	0 to 1 MPa
ISE71	Air	Positive pressure	0 to 1.6 MPa
ISE70G	Air General fluids	Positive pressure	0 to 1 MPa
ISE75G	Air General fluids	Positive pressure	0 to 2 MPa
ISE76G	Air General fluids	Positive pressure	0 to 5 MPa
ISE77G	Air General fluids	Positive pressure	0 to 10 MPa

3-Screen Display Multi-channel Digital Sensor Monitor PSE200A

- Up to 4 pressure sensors can be connected!
Centralized control saves installation space.
A single monitor various applications
- It is possible to change the settings while checking the measured value.
- IO-Link compatible

Series	Rated pressure range	Applicable SMC pressure sensor
PSE200A	-0.2 to 2.1 kPa	PSE550
	10 to -105 kPa	PSE531/PSE541/PSE561
	-105 to 105 kPa	PSE533/PSE543/PSE563/PSE573
	-10 to 105 kPa	PSE532
	-50 to 525 kPa	PSE564/PSE574
	-0.105 to 1.05 MPa	PSE530/PSE540/PSE560/PSE570
	-0.105 to 2.1 MPa	PSE575
	-0.25 to 5.25 MPa	PSE576
	-0.5 to 10.5 MPa	PSE577

3-Color Display Digital Flow Switch for Large Flow PF3A7□H-L

- Applicable fluid: Air, N₂
- Flow range: Max. 12000 L/min
- Flow ratio 100:1
Wide range of flow measurement with one product
- Improved drainage and resistance to foreign matter
- Pressure loss: 75% reduction (20 kPa → 5 kPa)
- Through bore construction
- IO-Link compatible

Series	Rated flow range [L/min]
PF3A7□H-L	10 to 1000
	20 to 2000
	30 to 3000
	60 to 6000
	120 to 12000

* For the modular type, only 1000 or 2000 L/min can be selected.

2-Color Display Digital Flow Switch PF2M7-L

- Dry air, N₂, Ar, CO₂
- A wide range of flow measurement is possible with 1 product.
Flow ratio: 100 : 1,
Smallest settable increment: 0.01 L/min
- Improved drainage and resistance to foreign matter
- Compact, Lightweight
Weight: 27.3% lighter (55 g → 40 g)
- Low current consumption: 35 mA or less
- Grease-free
- IO-Link compatible

Series	Rated flow range [L/min]
PF2M7-L	0.1 to 10 (0.1 to 5)
	0.3 to 25 (0.3 to 12.5)
	0.5 to 50 (0.5 to 25)
	1 to 100 (1 to 50)

() : For CO₂

Booster Regulator

RoHS

Size: 10A

**Air consumption
40% reduction^{*1}**

- 3 piston construction
- The drive chamber on one side can be operated by the exhaust return circuit.

^{*1} Based on SMC's measuring conditions

Operation noise: 65 dB(A)^{*1}

^{*1} Based on SMC's measuring conditions

15 dB (A) reduction compared with the existing model (VBA series)

- Exhaust noise: Reduced noise due to exhaust of reused low-pressure air
- Metal noise: Reduced noise due to the adoption of a construction in which the internal switching part doesn't come into contact with any metal parts

Simple, compact shape

- Built-in silencer
- No longer any need for a pressure regulator knob due to the fixed pressure increase ratio

Charging time: 32% shorter

* Inlet pressure: 0.4 MPa, Air tank: 10 L

Can be mounted vertically

Mounting compatibility with the existing model (VBA series)

- Can be mounted on an air tank (VBAT series)
(The air tank must be ordered separately.)

VBA-X3145

Specifications

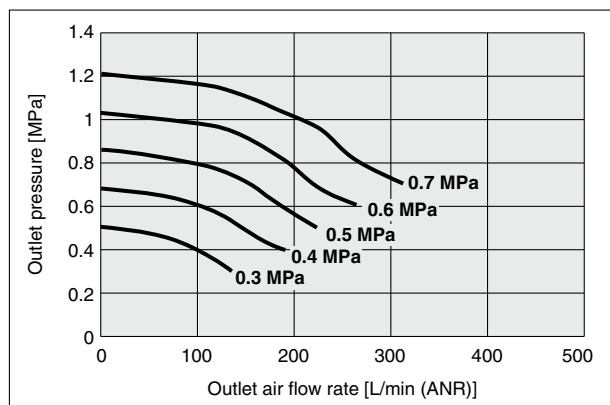

Model	VBA-X3145
Fluid	Compressed air
Pressure increase ratio	1.7 times (Fixed)
Pressure adjustment mechanism	None
Max. flow rate*1	L/min (ANR)
Outlet pressure range	MPa
Inlet pressure range	MPa
Proof pressure	MPa
Port size (IN, OUT)	Rc1/4
Tank connection port (with plug)	Rc1/4
Ambient and fluid temperatures	°C
Installation	Horizontal, Vertical
Lubrication	Grease (Non-lube)
Weight	kg

*1 Flow rate at IN = OUT = 0.5 MPa.

Flow Rate Characteristics/Charge Characteristics

Flow rate characteristics

Charge characteristics

Dimensions

Compact Cylinder/Air-saving Type

RoHS

ø32, ø40, ø50

Air consumption

Max. 46% reduction

- Uses the air exhausted from the extension side to supply the retraction side, thus reusing the air (Built-in exhaust return circuit)
- Reduce air consumption just by piping to the product

- The dimensions and mounting dimensions are the same as those of the existing CDQ2 series model.

* For the through-hole mounting type only

- With rubber bumper
- Small auto switches can be mounted on 3 surfaces.

Applicable auto switch: D-M9□

Specifications

Bore size [mm]		32	40	50
Action		Double acting, Single rod		
Fluid		Air		
Proof pressure		1.0 MPa		
Max. operating pressure		0.7 MPa		
Min. operating pressure		0.4 MPa		
Ambient and fluid temperatures		With auto switch: -10 to 60°C (No freezing)		
Lubrication		Not required (Non-lube)		
Piston speed	Extending operation	50 to 500 mm/s		50 to 300 mm/s
	Retracting operation	50 to 300 mm/s		
Stroke length tolerance		0 to +1.0 mm*1		
Cushion		Rubber bumper		
Port size	Retraction port	M5 x 0.8		Rc1/8
	Extension port	M5 x 0.8		Rc1/8
	Exhaust return port		M5 x 0.8	
Mounting orientation		Horizontal lateral, Vertical upward		
Min. theoretical output*2	Retracting operation	32 N	55 N	85 N
Allowable kinetic energy		0.29 J	0.52 J	0.91 J
Allowable lateral load at rod end (At 30 stroke)		7.6 N	10.9 N	15.8 N
Mounting		Basic type (Through-hole)		

*1 Stroke length tolerance does not include the amount of bumper change.

*2 Be aware that the cylinder output is reduced during the retraction operation.

The cylinder output values in the table above are the min. values. Therefore, depending on the operating conditions, the output may be greater.

Please contact your local sales representative for more details.

Handling

⚠ Warning

1. Residual pressure will remain in the exhaust return piping of this circuit.

To completely exhaust all of the residual pressure, install a 3-port valve for residual pressure exhaust in the exhaust return piping.

2. The adjustment range for the throttle valve for retraction operation speed adjustment is, starting from the fully closed position, within the number of rotations shown in the table below.

Bore size [mm]	Number of rotations
32, 40	3.5 rotations or less
50	4.5 rotations or less

To adjust the throttle valve, use a 3 mm flat head watchmaker's screwdriver.

The adjustment range for the throttle valve is, between the fully closed position and the open position, within the range indicated in the table above.

A retaining mechanism prevents the throttle valve from slipping out; however, it may spring out during operation if it is rotated beyond the range shown above.

⚠ Caution

1. Pipe according to the circuit diagram shown below when using this cylinder.

Circuit diagram

2. For exhaust return, the selection and installation of suitable fittings, tubes, and devices is required. Please contact your local sales representative for more details.
3. For the solenoid valve, select a single unit (body ported or base ported) external pilot type.
4. Follow the instructions below to adjust the speed of this cylinder.
 - Extending operation: Use the speed controller (meter-in) installed between the extension port and the solenoid valve.
 - Retracting operation: Use the built-in throttle valve on the cylinder.
5. As the retracting operation of this cylinder is performed with low pressure and low thrust, refrain from applying more external force than necessary.
6. Pivot brackets cannot be used.

Compact Cylinder/ Polygonal Piston Square Type

RoHS

Size: 32, 40, 50

Now, more compact and lightweight due to the adoption of a polygonal piston!

Weight **30%^{*1} reduction**
199 g → 139 g

Height **15%^{*1} reduction**
49.5 mm → 42 mm

Width **13%^{*1} reduction**
45 mm → 39 mm

Overall length **11%^{*1} reduction**
50 mm → 44.5 mm

*1 Compared with the CDQ2 series, ø32, 10 mm stroke

Shortened height
7.5 mm

Polygonal piston square type
Size 32, 10 mm stroke

■ Small auto switches can be mounted on 4 surfaces.

Applicable auto switch: D-M9□

⚠ Specific Product Precautions

⚠ Caution

1. Do not apply external force to the auto switch mounting rail.

Doing so may cause the rail to become deformed, resulting in auto switch malfunction. In addition, repeatedly bending or stretching the lead wires may also result in malfunction.

Air Cylinder/Double Force Type RoHS

Size: 57

This product is capable of providing double the force of the MB series, without changing the width, due to the adoption of a rectangular piston.

- * Comparison with tandem cylinders satisfying the following conditions: a cylinder of the same width with double the theoretical output.
- * The width of the MB standard model and the MB tandem cylinder are the same.

Overall length **47%^{*1} reduction**
335 mm → 179 mm

Weight **20%^{*1} reduction**
1500 g → 1200 g

*1 Compared with the existing tandem type cylinder -XC12 (double force), ø40, 50 mm stroke

Tandem cylinder (-XC12)/ Double force

When air pressure is supplied to the A and C ports at the same time, double the force can be obtained for the extending operation.

■ Small auto switches can be mounted on 4 surfaces.
(Tie-rod mounting)

Applicable auto switch: D-M9□

■ Air cushion adjustment is not required due to the non-adjustable air cushion.

The built-in rubber bumper reduces the metal noise that occurs when the piston stops.

■ Cover shape that prevents foreign matter accumulation

Operating Speed

Be sure to connect a speed controller to the cylinder and adjust its speed to 500 mm/s or less. If a load is to be attached to the end of the rod, adjust the speed to the max. speed shown in the graph above or less, in accordance with the load mass.

Caution

When securing a workpiece to the end of the piston rod, ensure that the piston rod is fully retracted, and place a wrench on the portion of the rod that protrudes. Then, tighten without applying tightening torque to the piston rod.

Compact Guide Cylinder/ Rectangular Piston Type

RoHS

Size: 25, 32

Now more lightweight and compact due to the adoption of a rectangular piston

Width **21%^{*1} reduction**
48 mm → 38 mm

Weight **37%^{*2} reduction**
3.29 kg → 2.07 kg

Overall length **7%^{*1} reduction**
100 mm → 93 mm

*1 Compared with the existing MGPM series model, ø32, 25 mm stroke
*2 Compared with the existing MGPM series model, ø32, 150 mm stroke

Shortened width

The allowable rotational torque of the plate and the non-rotating accuracy are the same as those of the existing MGP series model.

The allowable lateral load and the allowable kinetic energy are the same as those of the existing MGP series model.

Shortened overall length

Mounting is possible from 3 directions.

MGPM-X3159

Specifications

Size	25 (Equiv. $\varnothing 25$ piston area)	32 (Equiv. $\varnothing 32$ piston area)
Action	Double acting	
Fluid	Air	
Proof pressure	1.05 MPa	
Max. operating pressure	0.7 MPa	
Min. operating pressure	0.1 MPa	
Ambient and fluid temperatures	5 to 60°C	
Piston speed	50 to 500 mm/s	
Cushion	Rubber bumper on both ends	
Lubrication	Not required (Non-lube)	
Stroke length tolerance	$^{+1.5}_0$ mm	
Allowable kinetic energy	0.18 J	0.29 J
Allowable lateral load (at 50 stroke)	5.0 kg	16.7 kg

Handling

⚠ Warning

1. Residual pressure will remain in the exhaust return piping of this circuit.

To completely exhaust all of the residual pressure, install a 3-port valve for residual pressure exhaust in the exhaust return piping.

2. The adjustment range for the throttle valve for retraction operation speed adjustment is, starting from the fully closed position, within the number of rotations shown in the table below.

Bore size [mm]	Number of rotations
32, 40	4.5 rotations or less
50	3 rotations or less

To adjust the throttle valve, use a 3 mm flat head watchmaker's screwdriver.

The adjustment range for the throttle valve is, between the fully closed position and the open position, within the range indicated in the table above.

A retaining mechanism prevents the throttle valve from slipping out; however, it may spring out during operation if it is rotated beyond the range shown above.

⚠ Caution

1. Pipe according to the circuit diagram shown below when using this cylinder.

Circuit diagram

2. For exhaust return, the selection and installation of suitable fittings, tubes, and devices is required. Please contact your local sales representative for more details.
3. For the solenoid valve, select a single unit (body ported or base ported) external pilot type.
4. Follow the instructions below to adjust the speed of this cylinder.
 - Extending operation: Use the speed controller (meter-in) installed between the extension port and the solenoid valve.
 - Retracting operation: Use the built-in throttle valve on the cylinder.
5. As the retracting operation of this cylinder is performed with low pressure and low thrust, refrain from applying more external force than necessary.
6. Pivot brackets cannot be used.
