C55-Z Series ISO Compact Cylinder

Improved features and related benefits

Ensures performance and rigidity

- Allowable lateral load has been improved by changing the material of the bushing

Space optimisation due to the extended range of motion

- Standard product stroke limit increased up to 300 mm

Perform equal output force in both directions

- Double rod as a standard option

Interchangeability and design flexibility

- Compliant with ISO standards (ISO 21287)
- Identical construction
- Same specifications and dimensions
